Do not have them make catapults for the Angry Birds Parabola Project. This will take entirely too much time on things unrelated to the standards you are supposed to be teaching. If this is the version of the project you want to do then partner with a shop class or art class where creating the catapult will meet a standard for that teacher.

Angry Birds Parabola. Author: DThomas. Topic: Parabola. Your task is to come up with three quadratic equations that will create parabolas that goes through both the Angry Bird on the slingshot and the Pig. At least one of these parabolas must stay on the screen at all times. Why do you think the a value must always be negative in this situation? For one of your parabolas that is always on the screen, note the vertex and axis of symmetry.
