lect. Without a solid understanding of the history of theory, anthropological data remain a collection of exotic ethnographic vignettes. With a knowledge of theory, these vignettes become attempts to answer critical philosophical and practical problems. Thus it is critical that anthropologists understand theory and its historical context.

This overview of the history of anthropological theory provides a comprehensive history from antiquity through to the twenty-first century, with a focus on the twentieth century and beyond. Unlike other volumes, it also offers a four-field introduction to theory. As a stand-alone text, or used in conjunction with the companion volume *Readings for a History of Anthropological Theory*, Erickson and Murphy offer a comprehensive, affordable, and contemporary

introduction to anthropological theory. The third edition has been updated and fully revised throughout to closely parallel the presentation in the companion reader, making it easier to use both books in tandem. New original essays by contemporary theorists bring theories to life, and portraits of important theorists make it a handsome volume. Sources and suggested readings have been updated, and glossary definitions have been updated, streamlined, and standardized.

## Textbook

This revised textbook provides students with a first exposure to the growing field of medical anthropology. The narrative is guided by unifying themes. First, medical anthropology is actively engaged in helping to address pressing health problems around the globe through research, intervention, and policy-related initiatives. Second, illness and disease cannot be fully understood or effectively addressed by treating them solely as biological in nature; rather, health problems involve complex biosocial processes and resolving them requires attention to range of factors including systems of belief, structures of social relationship, and environmental conditions. Third, through an examination of health inequalities on the one hand and environmental degradation and environment-related illness on the other, the book underlines the need for going beyond cultural or even ecological models of health toward a comprehensive medical anthropology. The authors show that a medical anthropology that integrates biological, cultural, and social factors to truly understand the origin of ill health will contribute to more effective and equitable health care systems.

In a compelling mix of literary narrative and ethnography, anthropologist Alma Gottlieb and writer Philip Graham continue the long journey of cultural engagement with the Beng people of Côte d'Ivoire that they first recounted in their award-winning memoir *Parallel Worlds*. Their commitment over the span of several decades has lent them a rare insight. Braiding their own stories with those of the villagers of Asagbé and Kosangbé, Gottlieb and Graham take turns recounting a host of unexpected dramas with these West African villages, prompting serious questions about the fraught nature of cultural contact. Through events such as a religious leader's declaration that the authors' six-year-old son, Nathaniel, is the reincarnation of a revered ancestor, or Graham's late father being accepted into the Beng afterlife, or the increasing, sometimes dangerous madness of a villager, the authors are forced to reconcile their anthropological and literary gaze with the deepest parts of their personal lives. Along with these intimate dramas, they follow the Beng from times of peace through the times of tragedy that led to Côte d'Ivoire's recent civil conflicts. From these and many other interweaving narratives—and with the combined strengths of an anthropologist and a literary writer—*Braided Worlds* examines the impact of postcolonialism, race, and global inequity at the same time that it chronicles a living, breathing village community where two very different worlds meet.

This classic volume, edited by Sydel Silverman, presents the insiders' reflection of distinguished contemporary anthropologists on nine prominent
