Antique maps are maps made over 100 years ago. They are snapshots in time of our knowledge of the world. Map making began in earnest in the Age of Exploration. This started in the 15th century. As explorers roamed the world, they filled in open spaces on maps. As time passed, coastlines and interior details became more accurate. Antique maps are eye-catching focal points for any room.

We specialise in all the leading cartographers from Mercator, Ortelius, Blaeu, Munster, Homann etc and all the other important mapmakers from Aa to Zatta. Our selection of antique prints includes decorative prints of birds, flowers and animals. We also specialise in prints of Egypt, architecture and marine. A large selection of our maps can be seen each year at the prestigious London Map Fair at the Royal Geographical Society, where most of the world's leading map dealers exhibit.

Michael Jennings Antique Maps and Prints

We are professional specialist dealers for Antique Maps & Atlases, founded in 1982 by Mick Tooley (1898-1986), Douglas Adams (1931-2004) and Steve Luck (1953-). Ronald Vere Tooley (Mick) was the author of many of the standard reference works on map collecting. We stock a large selection of original printed maps, 15th-19th Centuries.

A standard reference work and collector's guide to old maps. Antique Maps is now firmly established as a definitive reference work. With extensive information on the general historical background, details of all the major map-makers and practical advice on collecting old maps, it provides an excellent introduction for the beginner as well as a mass of precise and clearly organized information for the expert and the serious collector. A beautiful edition in itself, this timeless volume evokes the elegance of maps from the past and the charm of all the distant places they suggest, to show them not only as historical artefacts but also as works of art.

The story of an infamous crime, a revered map dealer with an unsavory secret, and the ruthless subculture that consumed him Maps have long exerted a special fascination on viewers—both as beautiful works of art and as practical tools to navigate the world. But to those who collect them, the map trade can be a cutthroat business, inhabited by quirky and sometimes disreputable characters in search of a finite number of extremely rare objects. Once considered a respectable antiquarian map dealer, E. Forbes Smiley spent years doubling as a map thief —until he was finally arrested slipping maps out of books in the Yale University library. The Map Thief delves into the untold history of this fascinating high-stakes criminal and the inside story of the industry that consumed him. Acclaimed reporter Michael Blanding has interviewed all the key players in this stranger-than-fiction story, and shares the fascinating histories of maps that charted the New World, and how they went from being practical instruments to quirky heirlooms to highly coveted objects. Though pieces of the map theft story have been written before, Blanding is the first reporter to explore the story in full—and had the rare privilege of having access to Smiley himself after he'd gone silent in the wake of his crimes. Moreover, although Smiley swears he has admitted to all of the maps he stole, libraries claim he stole hundreds more—and offer intriguing clues to prove it. Now, through a series of exclusive interviews with Smiley and other key individuals, Blanding teases out an astonishing tale of destruction and redemption. The Map Thief interweaves Smiley's escapades with the stories of the explorers and mapmakers he knew better than anyone. Tracking a series of thefts as brazen as the art heists in Provenance and a subculture as obsessive as the oenophiles in The Billionaire's Vinegar, Blanding has pieced together an unforgettable story of high-stakes crime.

Discover the mysteries within ancient maps — Where exploration and mythology meet This richly illustrated book collects and explores the colorful

histories behind a striking range of real antique maps that are all in some way a little too good to be true. *Mysteries within ancient maps: The Phantom Atlas* is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. Where exploration and mythology meet: Author Edward Brooke-Hitching is a map collector, author, writer for the popular BBC Television program *QI* and a Fellow of the Royal Geographical Society. He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. *Cartography's greatest phantoms: The Phantom Atlas* uses gorgeous atlas images as springboards for tales of deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms. If you are a fan of this popular genre and a reader of books such as *Prisoners of Geography*, *Atlas of Ancient Rome*, *Atlas Obscura*, *What If*, *Book of General Ignorance*, or *Thing Explainer*, you will love *The Phantom Atlas*

The highly anticipated second edition of *Collecting Old Maps* is completely revised and expanded with over 400 color illustrations. While maintaining the original approach to the nuts and bolts of map collecting, there is new information on collecting in the digital age, building and disposing of a collection, papermaking history, and the mythological figures, symbols and allegory used in cartography. The most significant change to this new edition is the Map Gallery, which is more comprehensive and profusely illustrated in full color. Nearly 200 maps were assembled to illustrate the five-century evolution of printed maps and how they changed both artistically and technically in response to various cultural and market influences. They illustrate the progression from the simple woodcuts of the incunabula period to the elegant copperplate engravings of Renaissance Italy, then to the Baroque Dutch compositions, the refined style of scientific cartographers, and finally the technically advanced, but sometimes whimsical, approach of 20th-century mapmakers. These maps represent a broad range of geographic regions, cartographic importance, and prices. Rather than focusing on the rare and obscure, these are maps that can be collected today.

The author explores evidence given in ancient Chinese writings, archaeological finds in the Americas, and in ancient Chinese maps; demonstrating the likelihood that America was discovered by the Chinese, not Europeans.
