To set the service center address, perform a set operation with the +CSCA AT command using the following syntax: (Optional parameters are enclosed in square brackets.) +CSCA=address[,address_type] The address Parameter. The first parameter of the +CSCA AT command, address, specifies the SMSC address to be set. Usually it is a phone number formatted using the typical ISDN / telephony numbering plan (ITU E.164/E.163).

AT command, the setting is valid until you change it. Some AT commands are not supported by all Nokia's products. Giving a command which is not supported causes an error response. Also, some parameters may not be supported by all products, and in this case those parameters are just ignored in commands or left blank in responses.

Use the CLI to access, configure, and manage Nokia's routers. CLI commands are entered at the command line prompt. Access to specific CLI commands is controlled by the permissions set by your system administrator. Entering a CLI command makes navigation possible from one command context (or level) to another.
