AV-8B Harrier II from VMA-231 landing in 2003 In April 2003 a detachment from the squadron took part in the invasion of Iraq as part of the 24th Marine Expeditionary Unit . In the spring of 2007 they deployed to Al Asad Airbase again in support of Operation Iraqi Freedom .

VMA-231 - Wikipedia
This is a list of operators of the Harrier family of military V/STOL aircraft, designed and built in the United Kingdom and United States of America. The members of family were Hawker Siddeley P.1127, Hawker Siddeley Harrier, British Aerospace Sea Harrier, McDonnell Douglas AV-8B Harrier II, and British Aerospace Harrier II. As of 2012, only the AV-8B and Sea Harrier remain in active service.

AV-8B Harrier II Units of Operation Enduring Freedom ...
When Iraq invaded Kuwait in August 1990, a coalition of nations launched Operation Desert Shield in order to defend Saudi Arabia. The Harrier II was among the first tactical air assets to be deployed to the region to support ground forces in their efforts to halt the advance of Iraqi forces at the border with Kuwait and Saudi Arabia.

AV-8B Harrier II Units of Operations Desert Shield ...
Around 60 of these aircraft were sea-based aboard four 'Harrier carriers', while two units flew from Ahmed al Jaber, in Kuwait. Unlike in 1991, when the Harrier II units employed unguided weapons - dumb bombs, cluster bombs and napalm - in 2003 79 per cent of the ordnance dropped was precision-guided. This was primarily due to the AV-8B's upgrading into Night Attack or radar-equipped configuration, and introduction of the Litening targeting pod.

AV-8B Harrier II Units of Operation Iraqi Freedom I-VI ...
These were replaced by the Harrier II, designated as the AV-8B, which was introduced into service in 1985. The performance of the Harrier in USMC service led to calls for the United States Air Force to procure Harrier IIs in addition to the USMC's own plans, [119] but these never resulted in Air Force orders.

The AV-8B Harrier was, and still is, the only tactical aircraft that can deploy with the US Marine Corps on amphibious assault ships and provide air cover and close air support separate from large deck aircraft carriers. Having seen action during Operation Desert Storm in 1991, the Harrier II returned to the theatre from March 2003 as part of Operation Iraqi Freedom. In the initial conflict some 76 AV-8Bs were deployed, providing more than 40 per cent of the 3rd Marine Air Wing's fixed-wing offensive firepower. Around 60 of these aircraft were sea-based aboard four 'Harrier Carriers', while a unit flew jets from Ahmed al Jaber, in Kuwait. Unlike in 1991, when Harrier IIs employed unguided weapons, 79 per cent of the ordnance dropped was precision-guided. This was primarily due to the AV-8B's upgrading to Night Attack or radar-equipped configuration, and the introduction of the Litening II targeting pod. Following the occupation of Iraq by Coalition troops, Harrier IIs remained in-theatre supporting anti-insurgent operations through to 2008 as part of OIF II-VI.

The AV-8B is the only tactical aircraft that can deploy with Marine forces on amphibious assault ships and provide air cover and close air support separate from large deck aircraft carriers. When Iraq invaded Kuwait in August 1990, a coalition of nations launched Operation Desert Shield in order to defend Saudi Arabia, and the Harrier II was among the first tactical air assets to be deployed to the region. During Operation Desert Storm, the five units flying the AV-8B in-theatre became some of the top tactical squadrons of choice by air mission planners because of the pilots' skill as well as the plane's vertical take-off ability. The previously untold story of the AV-8B in this conflict is vividly brought to life by the author through first-hand accounts and period photography sourced from those that were there and official archives. This will be the first of three volumes on USMC Harrier IIs in combat, with follow-on titles covering the jet's operations in Iraq in 2003-08 and Afghanistan in 2001-2009.

In the 1970s the USMC bought the AV-8A Harrier from the UK whose VTOL capabilities allowed it to serve as a tactical aircraft that could deploy with Marine forces on amphibious assault ships and provide air cover and close air support from large deck aircraft carriers. Third in a trilogy on US Marine Corps Harrier IIs in combat, it will be the first volume to cover the whole story of the AV-8B's service employment during peacekeeping operations and then in Afghanistan. With profile artwork for all frontline AV-8B units detailing the unique colours and markings applied by each squadron, this volume presents the widest variety of first-hand accounts of AV-8B air operations and missions by pilots and ground forces involved in Operation Enduring Freedom published to date.

Nicknamed the 'flying dump truck', the A-1 was a key component in naval air wings from the end of World War II into the 1960s, allowing the aircraft to play its part in the escalating conflict in Vietnam. Both A-1 attack and EA-1F airborne early warning aircraft saw action in Southeast Asia from 1960 through 1969, when the last examples were finally retired from carrier decks. The A-1s in particular bombed targets in both North and South Vietnam, despite the aircraft being highly vulnerable to enemy flak and fighters. Co-written by a two-tour Vietnam War combat veteran in the A-1, this is the first book that focuses exclusively on the aircraft's service in Vietnam.

This title covers the technical characteristics of the F-104 Starfighter, one of the most widely-used and popular aircraft in history. Although built in small numbers for the USAF, the F-104C fought and survived for almost three years in Vietnam. There, it was engaged in some of the war's most famous battles including the legendary operation Bolo, where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter. This small, tough and very fast fighter, dubbed 'The Missile with a Man in It', was called upon to do things it was not specifically designed for, and did them admirably. Featuring illustrations and photographs detailing the variety of nose-paint schemes and weapons configurations, this comprehensive appraisal of the F-104 Starfighter is ideal for modelling and aviation enthusiasts alike.

This monograph is a preliminary accounting of the role of the U.S. Marine Corps' senior command in the Persian Gulf conflict from 8 August 1990 to 16 April 1991. It is one of a series covering the operations of the 1st Marine Division; the 2d Marine Division; the 3d Marine Aircraft Wing; Combat Service Support Element, comprised of 1st and 2d Force Service Support Groups units; Marines afloat in Desert Shield and Desert Storm; and humanitarian relief operations in northern Iraq and Turkey.

In Operation Iraqi Freedom, the Marine Corps’ ground campaign up the Tigris and Euphrates was notable for speed and aggressiveness unparalleled in military history. Little has been written, however, of the air support that guaranteed the drive’s success. Paving the way for the rush to Baghdad was “the hammer from above”—in the form of attack helicopters, jet fighters, transport, and other support aircraft. Now a former Marine fighter pilot shares the gripping never-before-told stories of the Marines who helped bring to an end the regime of Saddam Hussein. As Jay Stout reveals, the air war had actually been in the planning stages ever since the victory of Operation Desert Storm, twelve years earlier. But when Operation Iraqi Freedom officially commenced on March 20, 2003, the Marine Corps entered the fight with an aviation arm at its smallest since before World War II. Still, with the motto “Speed Equals Success,” the separate air and ground units acted as a team to get the job done. Drawing on exclusive interviews with the men and women who flew the harrowing missions, Hammer from Above reveals how pilots and their machines were tested to the limits of endurance, venturing well beyond what they were trained and designed to do. Stout takes us into the cockpits, revealing what it was like to fly these intense combat operations for up to eighteen hours at a time and to face incredible volumes of fire that literally shredded aircraft in midair during battles like that over An Nasiriyah . With its dynamic descriptions of perilous flights and bombing runs, Hammer

from Above is a worthy tribute to the men and women who flew and maintained the aircraft that so inspired their brothers in arms and terrified the enemy.

This book explores the role of the US Navy Hornet units in the northern Iraqi campaign. These units were the first Navy Reserve unit to be mobilized since the Korean War, and their attacks were launched from carriers off the coast of Turkey. The conflict for these squadrons was very different from the campaign fought in southern Iraq: they worked almost exclusively with clandestine Special Forces teams from the US Army, Marine Corps, Navy SEALs, British and Australian SAS and Kurdish guerrillas. First-hand accounts accompany the indispensable role these units had in the battle to liberate Iraq.

Deadly in its primary role as a submarine hunter, the PBY Catalina was the scourge of the Imperial Japanese Navy's submarine force. Its amphibious traits also made the aircraft well suited to air-sea rescue, and thousands of Allied airmen were saved from a watery grave by PBY crews. Using personal interviews, war diaries and combat reports combined with original Japanese records and books, Louis B Dorny provides a view on the role of the Catalina from both side of the war. Illustrated with over 80 photographs and colour profiles detailing aircraft markings, this is the definitive history of an insight into the PBY's use by the US Navy and Allied forces in the Pacific during World War 2.

In over 30 years of service, the Harrier has seen significant combat action for the British Royal Navy and the USMC: from the Falklands to Bosnia and Kosovo, from the First Gulf War to Afghanistan, the Harrier has played a key role. It has also seen service for Italy, Spain, and India. Distinctive and widely recognised, the Harrier was the world's first VSTOL aircraft and its appeal for the modeller is clear. This title covers modelling the Harrier across a variety of scales, from the early version P.1127 through to later models. Advice on weathering, superdetailing, conversions and display bases combines with a wealth of recommended reference sources to create this packed and informative guide to modelling the Harrier.
