Questions in the same group are rather similar to one another. The Concept Builder is coded to select at random a question from each group until a student is ...

~~Balanced vs. Unbalanced Forces Questions~~

Balanced forces are forces that are equal in size but opposite in direction. They do not cause a change in the motion of objects, forces that do cause this change are known as unbalanced forces. Unbalanced forces are able to change the motion of objects in two different ways. Unbalanced forces are not equal and opposite, this causes the change in motion. An example would be a tug of war ...
