The volume focuses on music during the process of European integration since the Second World War. Often music in Europe is defined by its relation to the concept of Occidentalism (Musik im Abendland; western music). The

emphasis here  
turns rather to  
recent  
manifestations of its  
evolvment in  
ensembles, events,  
musical  
organisations and  
ideas; questions of

This book analyzes  
how the EU  
referendum in the  
United Kingdom

came to pass and what the foreseeable consequences are for the UK, Europe, US and world economy. The Brexit decision represents a momentous event for Europe, which weakens the EU and shifts the global balance of power.

Welfens argues the EU has lost its appeal and is not in keeping with the twenty-first century, which is being shaped by Asia and digital innovations. The subject of immigration from EU countries played a key role in the Brexit decision,

with an anti-EU  
campaign that was  
profoundly biased.  
The estimated  
impact of the  
referendum was  
deeply distorted by  
the broadly  
inadequate  
information  
produced by the  
Cameron  
government, which  
omitted the

expected 10  
percent loss in  
income caused by

With this this  
information, there  
could have been a

majority. In the

dynamics also raise  
serious questions  
about the future of  
transatlantic

This book focuses  
on one of the most  
highly charged  
relationships of the  
Euro crisis, that  
between Greece

appraisal of the EU  
and that which  
divides us or keeps  
us together as

Europeans. These  
stories illustrate the  
book ' s broader  
argument about  
mutual recognition,  
an idea and norm at  
the very heart of  
the European  
project. The book is  
constructed around

a normative pivot.

On one hand, the authors suggest that the tumultuous affair between the two peoples can be read as “ mutual recognition lost ” through a thousand cuts. On the other, they argue that the relationship has only bent rather than broken down,

opening the  
potential for a  
renewed promise of  
mutual recognition  
and an ethos of  
“ fair play ” that may

book ’ s engaging  
story and original  
argument may  
appeal not only to  
experts of  
European politics

The Fund has recognized in recent years that one cannot separate issues of economic growth and stability on one hand and

equality on the  
other. Indeed, there  
is a strong case for  
considering  
inequality and an  
inability to sustain  
economic growth as  
two sides of the  
same coin. Central  
to the Fund ' s  
mandate is  
providing advice  
that will enable

economies to grow on a sustained basis. But the Fund has rightly been cautious about recommending the use of redistributive policies given that such policies may themselves undercut economic efficiency and the prospects for sustained growth

(the so-called  
“leaky bucket”  
hypothesis written  
about by the famous  
Yale economist  
Arthur Okun in the  
1970s). This SDN  
follows up the  
previous SDN on  
inequality and  
growth by focusing  
on the role of  
redistribution. It  
finds that, from the

perspective of the  
best available  
macroeconomic  
data, there is not a  
lot of evidence that  
redistribution has in  
fact undercut  
economic growth  
(except in extreme  
cases). One should  
be careful not to  
assume  
therefore—as Okun  
and others

have—that there is a big tradeoff between redistribution and growth. The best available macroeconomic data do not support such a conclusion.
