Clear English Pronunciation provides students with the tools to effectively communicate in English without centring solely on native-speaker pronunciation models. The focus of the book is on individual pronunciation targets rather than a one-size-fits-all approach. Divided into four sections, each featuring detailed articulatory explanations, sample sentences, and recordings to help learners improve their pronunciation, this book: introduces the phenomenon of pronunciation as part of a broader communicative realm; explains and demonstrates the melody and rhythm of understandable and natural English pronunciation; supports students in identifying and practicing their own pronunciation issues. Supported by an interactive companion website which features recordings and expanded explanations of key topics, Clear English Pronunciation is an essential textbook for international learners of English who want to improve their pronunciation skills in diverse social settings. <https://www.universiteitleiden.nl/clearenglishpronunciation>

¿Has estado estudiando inglés durante mucho tiempo pero te da la impresión de que todavía no entiendes con claridad a la gente inglesa? 0, lo que es peor, ¿no consigues hacer que te entiendan? Se trata de un problema muy común entre los hispanohablantes que han invertido muchos años de su vida en clases de inglés, logrando alcanzar un excelente nivel de vocabulario y gramática, y todavía con grandes dificultades a la hora de comunicarse oralmente. La mayoría de esos problemas podrían resolverse si los hispanohablantes hubiesen prestado más atención al aspecto de la pronunciación, teniendo en cuenta que es el área en la que más difieren el inglés y el español. Este libro está pensado para ayudar a resolver esos problemas de comunicación en inglés, presentando las cuestiones más relevantes de la pronunciación inglesa y comparándolas con aquellas de la pronunciación española. No sólo abarca las vocales y las consonantes, si no también otros aspectos como el ritmo, la entonación, o la colocación del acento. El libro viene acompañado de un CD-ROM con material de audio y ejercicios interactivos.

Designed as a handbook, this text provides media, speech (public speaking, interpersonal, small group, and organizational communication), and theatre educators with both the theoretical and practical ammunition to fight the assessment battles on their campuses. The philosophical implications of accountability are balanced with concrete, specific, and usable assessment strategies. Stressing student, faculty, course, program, department, and institutional assessment, this book's aim is to provide, in one place, information that will help diverse and complex communication programs face the growing challenges in assessment. The book is divided into three sections: background and foundational information for assessment; broad assessment strategies that apply to a variety of media, "speech," and theatre courses and programs; and context-specific assessment strategies. While covering a host of topics, it: * provides an overview of assessment and suggests how it might impact communication education, * discusses the elements of program assessment and how linkage of mission statements with outcomes can lead to strong, innovative programs, * compares and contrasts regional association requirements and presents a specific how-to strategy for writing outcome statements, * discusses teaching evaluation and argues that we need to identify the "what" of teaching before we try to measure the "how," * looks at creative ways for formative and summative course evaluation that starts with the creation of an explicit syllabus, * discusses the use of capstone courses as a way of evaluating not only their major but also how students have integrated their "total" educational experience, * suggests the variety of ways that interpersonal communication can be assessed and calls for future research that stresses the "knowledge" component of learning, * reports on a strategy for developing small group communication assessment measures, and * provides media, speech, and theatre faculty and administrators with the background, understanding and tools to build stonger programs and develop better courses and educational experiences for their students.

"This course offers current and prospective teachers of English a comprehensive treatment of pronunciation pedagogy, drawing on both current theory and practice. The text provides: - an overview of teaching issues from the perspective of different methodologies and second language acquisition research - innovative teaching techniques - a thorough grounding in the sound system of North American English - insight into how this sound system intersects with spelling, morphology, listening, and discourse - diagnostic tools and assessment measures - suggestions for syllabus design. Discussion questions and exercises encourage teachers to draw on their personal language learning/teaching experience as they assimilate the contents of each chapter. A training cassette offers practice in assessing learners' pronunciation"--Publishers's website.

This book offers a comprehensive overview of the changes in foreign language teachers' cognition and practices during a four-year innovation project at a Chinese secondary school, and explores the factors that influenced the trajectory of those changes. It makes a substantial contribution to research on educational change by offering a longitudinal observation of the facts and voices in EFL settings in China; as such, the book offers a valuable resource for scholars, teacher educators, teachers, and others interested in initiating, managing and evaluating innovations in EFL classrooms.

Learning to Teach Modern Foreign Languages in the Secondary School has established itself as the leading textbook for student teachers of modern foreign languages in the UK. The practical focus of the book is underpinned by a theoretical perspective, and students are encouraged to develop a personal approach to modern foreign language teaching. An account is also taken of relevant statutory frameworks. This fully revised, third edition has been thoroughly updated to take account of recent policy and curriculum changes. And, with the recent increased emphasis on teachers as researchers, and the alignment of many PGCE courses, with Masters Level criteria, reference to important concepts and theoretical positions have been strengthened with strong reference to their relevance in the context of professional practice and a new chapter discussing the findings of research on Second Language Acquisition and Foreign Language Learning has been added. Other chapters cover a wide range of relevant topics, including: teaching methods and learning strategies teaching in the target language and developing cultural awareness the teaching of grammar differentiation and assessment the use of ICT in modern foreign language teaching.

"In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago, British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian

nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests, and the design of workable curriculums. The chapters in this book, written by leading English-teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use English as medium of instruction for its multilingual population, Korea developing English education policies to recognize the increased role of English alongside the national language, India building on its colonial past to make English an economic resource, Vietnam fitting English into a program of national rebuilding, and Taiwan spreading its English teaching outside the national capital. This is not a report of the views of outside experts, but of local experiences understood by local scholars of international standing. Policy makers, educators, researchers and scholars will be able to gain valuable insights from Asian experts"--
