The book delivers a history from below for the first half of Egyptian history covering the earliest settlements, state formation and the pyramid age. The focus is on the Wadjet province, about 350 km south of modern Cairo in Upper Egypt. Here archaeological records provide an especially rich dataset for the material culture of farmers. Histories of Ancient Egypt

Download Ebook Cobra 3195

have focussed heavily on the kings, monuments and inscriptions, while the working population is hardly mentioned. The book investigates the life of people far from the centres of power. One main aim of the book is the interaction between farmers and the ruling classes at the centres of power and locally. How did decisions at the royal centre affect the life of ordinary people? The Introduction offers a critical survey of Egyptologists and their attitudes towards the working class. The social and cultural background of these researchers is analysed to assess how heavily they are influenced by time and their political and cultural background. The First chapter then describes the location and gives a history of previous research and excavations. The archaeological sites and the recorded

Download Ebook Cobra 3195

ancient place names of the province are presented to provide a geographical framework for the book. The following chapters are arranged in chronological order, mainly according to the archaeological phases visible in the province. It appears that in phases of a weak central government, people in the provinces were much better off, while in phases of a strong central government burials of poorer people are almost absent. The reasons for this are discussed. A substantial part of the book comprises descriptions of single burials and the material culture in the province. The archaeology of the poorer people is the main focus. Burial customs and questions of production are discussed. For a fuller picture, evidence from other parts of Egypt is also taken into account. Thus settlement sites in other regions are

Download Ebook Cobra 3195

presented to provide contemporary evidence for living conditions in particular periods. As the book will focus on the lower classes, the Tributary Mode of Production will be used as the main theoretical framework. The Tributary Mode of Production (previously known as the Asiatic Mode of Production) is a term that goes back to Karl Marx, but was mainly used in the 20th century to describe ancient societies whose economies were not based on slaves. A constant question will be the status of the working population. Were they slaves, serfs or free citizens? It will be argued that they were most often in a dependent position comparable to that of serfs, while there is little evidence for slavery. The numerous burials presented in the volume are important for highlighting the diversity of burials

in the different periods. Many will be placed in special subchapters. Readers can skip these chapters when they prefer to concentrate on the main text.

This book tells the complex saga of a sports car that was created in the early 1960s as a result of an unlikely collaboration between a plain-talking ex-racing driver from Texas and a conservative British automobile manufacturer, funded by one of the giants of the industry, the Ford Motor Company. Carroll Shelby, AC Cars, and Ford came together to create a car called the Cobra, based on the AC Ace roadster that had been in production since 1954. When the Shelby Cobra was created, it was far

Download Ebook Cobra 3195

from state-of-the-art, but the use of a new series of Ford V8 engines saw the lightweight car annihilate the Chevrolet Corvette in American sports car racing. By adding aerodynamic bodywork, the Daytona Cobra Coupe arrived in Europe to contest the FIA World Championship and took victory in the GT category in 1965, making Shelby American the first (and only) USA-based manufacturer to achieve this feat. In order to capitalize on this success, even greater power was required and the car was developed to take a huge 7-liter engine that proved to be a triumph of horsepower over handling – thus the 427 Cobra became an overnight legend, establishing new performance records and creating a reputation for being more than a little tricky to drive. The era of the Cobra was brief – production ended at Shelby

American during 1966 and at AC Cars in 1968 where they built their own final version, the AC289 Sports. Just over 1000 Cobras were built during that time but the final cars proved difficult to sell, their vintage qualities deterring potential owners. Carroll Shelby closed his company and went to Africa while AC developed other models, but the Cobra was not quite finished yet. Within a matter of a few years, a new market for the car was created as the demand for affordable kit cars grew. The most popular model by far was the Cobra and many thousands were built, with the result that both AC Cars and Carroll Shelby put their own versions back into production. And then the arguments really started... If it was an improbable car over forty years ago, it is even more implausible today, but the remarkable Cobra, in one form

or another, is still with us. It may be dead, but it just won't lie down!

Seit Langem schon waren Phil und ich einer hochkriminellen Organisation auf der Spur - der CITU, die ihren Sitz auf der honduranischen Insel Untaba hatte. Endlich standen wir kurz davor, den Kopf der Bande hochzunehmen und die gesamte Organisation endgültig zu zerschlagen. Dazu hatten wir den Mann nach Washington gelockt. Doch nachdem wir ihn festgenommen hatten, eröffnete er uns seelenruhig, er habe mehrere Bomben in der Stadt platziert. Und bevor wir irgendetwas dagegen unternehmen konnten, ging bereits die erste Bombe hoch!
