Since 1970, G. & M. Venditti Compressors Ltd. have been designing, installing, servicing and repairing compressor systems, pipework, and compressed air dryers and filtration. We are the main agents in ...

VOWMES1 &2 Graham & Trotman, a member of the Kluwer Academic Publishers Group is one of Europe's leading publishers of MAJOR COMPANIES OF EUROPE 1990/91, Volume 1, business information, and publishes company reference contain- us-ful information on over 4000 of the top annuals on other parts of the world as follows: comp-nies In the European Economic Community, excluding the UK, nearly 1500 companies of which are MAJOR COMPANIES OF THE ARAB WORLD covered in Volume 2. Volume 3 covers near-y 1100 of the MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA top companies within Western Europe but outside the MAJOR COMPANIES OF THE U.S.A. European Economic Community. Altogether the three volumes of MAJOR COMPANIES OF EUROPE now Please send for a free complete catalogue of the provide in authoritative detail, vital information on over company's books on business management techniques, 6600 of the largest companies in Western Europe. business law, finance, banking, export markets, oil technology, energy resources, pollution control and a MAJOR COMPANIES OF EUROPE 1990/91, Volumes 1 number of other subject areas to: The Editor, Major & 2 contain many of the largest companies in the world. The Companies of Europe, Graham & Trotman Ltd, Sterling area coverecj by these volumes, the European Economic House, 66 Wilton Road, London SW1V 1DE.

Volumes 1 & 2 Guide to the MAJOR COMPANIES OF EUROPE 1993/94, Volume 1, arrangement of the book contains useful information on over 4000 of the top companies in the European Community, excluding the UK, over 1100 This book has been arranged in order to allow the reader to companies of which are covered in Volume 2. Volume 3 covers find any entry rapidly and accurately. over 1300 of the top companies within Western Europe but outside the European Community. Altogether the three Company entries are listed alphabetically within each country volumes of MAJOR COMPANIES OF EUROPE now provide in section; in addition three indexes are provided in Volumes 1 authoritative detail, vital information on over 6500 of the largest and 3 on coloured paper at the back of the books, and two companies in Western Europe. indexes in the case of Volume 2. MAJOR COMPANIES OF EUROPE 1993/94, Volumes 1 The alphabetical index to companies throughout the & 2 contain many of the largest companies in the world. The Continental EC lists all companies having entries in Volume 1 area covered by these volumes, the European Community, in alphabetical order irrespective of their main country of represents a rich consumer market of over 320 million people. operation. Over one third of the world's imports and exports are channelled through the EG. The Community represents the The alphabetical index in Volume 1 to companies within each world's largest integrated market.

The switched reluctance machine (SRM) is the least expensive electrical machine to produce, yet one of the most reliable. As such, research has blossomed during the last decade, and the SRM and variable drive systems using SRMs are receiving considerable attention from industry. Because they require a power electronic converter and controller to function, however, successful realization of an SRM variable drive system demands an understanding of the converter and controller subsystems and their integration with the machine. Switched Reluctance Motor Drives provides that understanding. It presents a unified view of the machine and its drive system from all of its system and subsystem aspects. With a careful balance of theory and implementation, the author develops the analysis and design of SRMs from first principles, introduces a wide variety of power converters available for driving the SRM, and systematically presents both low- and high-performance controllers. The book includes an in-depth study of acoustic noise and its minimization along with application examples that include comparisons between ac and dc drives and SRM drive. The result is the first book that provides a state-of-the-art knowledge of SRMs, power converters, and their use with both sensor-based and sensorless controllers. Switched Reluctance Motor Drives enables both students and engineers to learn all aspects of SRM drive systems and appreciate the interdependence of the various subsystems in performance optimization.

Civil Engineering for Underground Rail Transport focuses on civil engineering techniques in underground rail construction. The book first discusses the need for underground rail transport, including justification of underground systems and the techniques of civil engineering in underground construction. The text looks at civil engineering aspects of route planning. Curvature and gradients, drainage, ventilation, working sites, rolling stock depots, and construction materials are discussed. The book also discusses civil engineering aspects of station location and design, ground treatment, and tracks for underground railways. The text then examines cut and cover design and construction in reinforced concrete. Form and layout, construction methods, soil/structure interaction, reinforced concrete design, and design development are described. The compilation also looks at the construction of concrete piling and diaphragm walls, hand-dug caissons or wells, large reinforced concrete caissons, and immersed-tube and precast concrete tunnels. Tunneling machines and types of tunnels are also described. The book is a good source of information for readers interested in civil engineering.

Two pioneer balloonists, Tom Gatch in 1974 and Larry Newman in the early 1990s, led widely reported stratospheric expeditions that nearly earned them a place in aviation history. They both used pressurized balloons, a dangerous and sophisticated type of aircraft, and sought the swift wind of the jet stream to carry them forward. In the first story, a determined, self-financed and self-reliant Tom Gatch in his Light Heart tries to become the first man to conquer the Atlantic Ocean alone by balloon. Ascending under a 10-balloon cluster, he makes it halfway across before disappearing, and the Department of Defense mounts a massive but futile mid-ocean search. What happened to him? Why did he do it? In the second story, Larry Newman leads an international crew in Earthwinds, the most expensive and heavily marketed balloon expedition ever undertaken, attempting to become the first to fly around the world non-stop. He often said that his 354-foot tall aircraft was more complicated to fly than the Space Shuttle. He makes three ascents, each with a different crew. With amusing, anguishing and astonishing frankness, the aeronautical adventures of Light Heart and Earthwinds are presented for the first time from a true insider's perspective.
