This book addresses two main questions, namely how to prepare high-quality teachers in the 21st century and how the East and the West can learn from each other. It addresses the different challenges and dilemmas that eastern countries, especially China, and western countries are facing with regard to teacher education. We explore the question by examining teacher education research, practice and policy in different countries, identifying both common problems and country-specific challenges. We then try to find valuable

experiences, theories and practice which can solve specific problems in the process of teacher education, also addressing how local and global factors impact it. In this regard, our approach does not strictly separate pre-service teacher education from teachers' in-service professional development, adopting an integrative perspective. Further, we believe the respective social and cultural contexts must also be taken into account. Lastly, we call for teachers' knowledge and individual character traits to be accounted for in the education of high-quality teachers.

The television images were blurry black-and-white phantoms. The cameras shook as the rocket moved, but by the end of the day, one thing was clear: a new hero rode that rocket and became the center of the world's attention for the four hours and fifty-five minutes of his flight. He became celebrated in all corners of the world as not just the first American to orbit the Earth, but as the first space traveler to take the human race with him. From that day forward, Glenn restively wore the hero label. Wherever he went, people knew his name and what he had done. Refusing to let that dramatic day define his life, he went on to become a four-term US senator—and returned to space

at the age of seventy-seven. The Last American Hero examines the many layers that formed the man and unravels the reasons for his singular role. He was a creation of the media, in some ways, but he was also a product of the Cold War. Not even Glenn himself seemed to fully understand his celebrity. He was a war hero, a two-time astronaut, a veteran senator, a devoted husband, a father, and much more. At a time when increasingly cynical Americans need heroes, his aura burns brightly in American memory.
