One reason the decision in *Roe v. Wade* took so long is because the case was argued twice. McCorvey's attorneys filed the lawsuit in 1970 and it was taken up by the Supreme Court in December of 1971. The attorney representing Texas was named Jay Floyd, and he opened his argument by telling what people have since called the "worst joke in legal history," referencing the two female attorneys, Sarah ...

Points one through five attempted to eliminate the immediate causes of the war: imperialism, trade restrictions, arms races, secret treaties, and disregard of nationalist tendencies. Points six through 13 attempted to restore territories occupied during the war and set post-war boundaries, also based on national self-determination.

How to create a simulation where participants have a sense of freedom and personal control while still maintaining the structure necessary for an effective story is a difficult task indeed. This book examines how to create an engaging, effective story (necessary to teach participants), while relating practical considerations of building a simulation. It also looks at stories as classic ways of teaching and gathering knowledge and considers other theories of interactive narrative design such as synthetic story creation and management and participant-generated story experiences. It also discusses enabling technologies in artificial intelligence, synthetic characters design and development, speech recognition technology, 3D modelling, and the future of story-driven games. Story Driven Simulations reviews the existing efforts in this field as well as focusing on the recent efforts of Paramount Pictures and The Institute for Creative Technologies at the University of Southern California, where this expert author team created successful simulations for the U.S. Army, Department of Defense, as well as other educational simulations.

What constitutes a fair procedure when it comes to EU competition law? This innovative book seeks to understand the philosophical considerations at the core of conflicting procedural fairness arguments in EU competition law practice. The author argues for a conceptualisation of procedural fairness as a distributional issue that can be solved by a practical fairness theory and a comprehensive methodology. To illustrate the usefulness of the conceptualisation, three procedural fairness problems from recent EU competition law practice are analysed: - the KME-Chalkor cases; - the Groupe Gascogne cases; - the regulatory question about using a collective redress mechanism for private enforcement of EU competition law. This unique approach provides a robust philosophical and methodological foundation for arguing about a wide range of procedural fairness dilemmas. The book is a must-read for academics and practitioners seeking an imaginative perspective on the philosophical foundations of arguments about procedural fairness in EU competition law and beyond.

150 powerful bite-size solutions for improving every decision you make! Three full books of practical guidance for making smarter, better decisions – in business, and in life! Discover how to learn and profit from your mistakes... minimize your risks, and act more decisively... make choices that help your organization thrive in change... make negotiating decisions that lead to win-win solutions and enduring business relationships... and much more! From world-renowned leaders and experts, including Robert E. Gunther, William S. Kane, and Leigh Thompson

A brand new collection of state-of-the-art tools for making better business decisions... 4 authoritative books bring together hundreds of bite-size, easy-to-use techniques for optimizing every business decision, choice, interaction, and negotiation! Your decisions drive your business performance and determine your career success. Whether you're collaborating, leading, negotiating, or persuading, those decisions must be consistently sharp – and this 4 book collection will help you sharpen every decision you make. Start with Robert Gunther's The Truth About Making Smart Decisions: 50 powerful bite-size "truths" about making better real-world decisions when it matters most. Gunther shows how to systematically prepare to make better decisions... get the right information, without getting buried in useless data... minimize risks and then act decisively... handle emotions... make better group decisions... profit from mistakes... and much more. Next, William S. Kane focuses on the decision to change – and to lead change. In The Truth About Thriving in Change, Kane shares 49 powerful decision-making "truths" about change leadership: which skills you need most, and how to develop them... how to lead change without eroding commitment or productivity... why you must start fast, and "run before you walk"... when to persuade, when to educate, and when to "use force"... how to create the right cultural framework for successful change, and more. Next, Leigh Thompson's The Truth About Negotiations helps you optimize every decision associated with successful negotiations. Thompson provides realistic game plans that work in any scenario, showing how to create win-win deals by leveraging carefully collected information. Learn how to prepare quickly and efficiently... handle imperfect negotiating situations... establish trust with someone you don't yet trust... recognize when to walk away. Thompson guides through planning strategy, identifying your "best alternative to a negotiated agreement," making the right first offer to control the process, resolving difficult disputes, and achieving the goals that matter most. Finally, in The Truth About Getting the Best From People, Second Edition, Martha Finney turns to day-to-day management decision-making, offering 60+ powerful techniques -- including new ways to persuade, manage virtual teams, overcome unconscious decision-making biases, and identify/cultivate high performers. These four books offer definitive, evidence-based principles for optimizing your decision-making throughout your entire management career! From world-renowned decision-making experts Robert E. Gunther, William S. Kane, Leigh Thompson, and Martha I. Finney

Toward Spiritual Sovereignty diagnoses societal samodaya (Buddhist terminology for emotional craving). The author uses extensive knowledge and wisdom from masters of ages past and present to refocus the spirit of man (spiritus mundi) on a wholesome re-creation of the world community. Every soul has the divine right to determine his or her sacred path to their unique destiny upon the horizons of learned choice. Political aggression, (governmental power), religious aggression (proselytizing), and financial aggression (voracious capitalism) provide conflict and work against the realization of happiness and wellbeing. These works are an attempt to advocate for the abolition of hindrance toward those ends, to advocate, without fetter, for spiritual sovereignty of every soul. Each person, Homo Divinitas (man of Divinity) should be able to experience life without threat. Threat can manifest in the form of hunger, poverty, illiteracy, illness, or physical/emotional/spiritual aggression. The 21st century provides an atmosphere of escalating violence, and terror, amidst the Middle East in particular, and the world in general. Such as the Roman Forum prior to the turn of the first millennia after Christ, mankind seems unable or unwilling to cease participation in the spiritual morphine of violence whether real, virtual, or vicarious. Mr. Casperson's authorship proposes effective measures for self-enlightenment and effective ways to cope with violence and political and religious terrorism. Comments and e-dialog are encouraged at the johncasperson.com website blog/site.

Exploring the concepts of ethics, morality, and decision-making for the law enforcement community, Decision Point: Real-Life Ethical Dilemmas in Law Enforcement offers an inside look at the difficult challenges officers confront every day as they face ethical decisions that could drastically alter the course of their careers. Through a series of real-life vignettes, the book reviews specific scenarios, the actual decisions that were made, and the consequences and implications of these decisions. Focusing on the critical thinking needed for making appropriate decisions, it retrospectively discusses considerations that were or should have been evaluated at the time. An engaging text ideal for classroom use, the book offers discussion questions at the end of each chapter that can be used as assignments, group breakout discussions, or professor-facilitated discussions.

#1 NEW YORK TIMES BESTSELLER • In this candid and gripping memoir, President George W. Bush describes the critical decisions that shaped his presidency and personal life. George W. Bush served as president of the United States during eight of the most consequential years in American history. The decisions that reached his desk impacted people around the world and defined the times in which we live. Decision Points brings readers inside the Texas governor's mansion on the night of the 2000 election, aboard Air Force One during the harrowing hours after the attacks of September 11, 2001, into the Situation Room moments before the start of the war in Iraq, and behind the scenes at the White House for many other historic presidential decisions. For the first time, we learn President Bush's perspective and insights on: • His decision to quit drinking and the journey that led him to his Christian faith • The selection of the vice president, secretary of defense, secretary of state, Supreme Court justices, and other key officials • His relationships with his wife, daughters, and parents, including heartfelt letters between the president and his father on the eve of the Iraq War • His administration's counterterrorism programs, including the CIA's enhanced interrogations and the Terrorist Surveillance Program • Why the worst moment of the presidency was hearing accusations that race played a role in the federal government's response to Hurricane Katrina, and a critical assessment of what he would have done differently during the crisis • His deep concern that Iraq could turn into a defeat costlier than Vietnam, and how he decided to defy public opinion by ordering the troop surge • His legislative achievements, including tax cuts and reforming education and Medicare, as well as his setbacks, including Social Security and immigration reform • The relationships he forged with other world leaders, including an honest assessment of those he did and didn't trust • Why the failure to bring Osama bin Laden to justice ranks as his biggest disappointment and why his success in denying the terrorists their fondest wish—attacking America again—is among his proudest achievements A groundbreaking new brand of presidential memoir, Decision Points will captivate supporters, surprise critics, and change perspectives on eight remarkable years in American history—and on the man at the center of events.

Beginning with the premise that the principal function of a criminal trial is to find out the truth about a crime, Larry Laudan examines the rules of evidence and procedure that would be appropriate if the discovery of the truth were, as higher courts routinely claim, the overriding aim of the criminal justice system. Laudan mounts a systematic critique of existing rules and procedures that are obstacles to that quest. He also examines issues of error distribution by offering the first integrated analysis of the various mechanisms - the standard of proof, the benefit of the doubt, the presumption of innocence and the burden of proof - for implementing society's view about the relative importance of the errors that can occur in a trial.

This is the eBook version of the printed book. If the print book includes a CD-ROM, this content is not included within the eBook version. We tend to be somewhat risk averse as a species. We are systematic and logical,

which sometimes makes us overcautious. Sure, look a decision squarely in the face. Consider it from every angle, but also focus on the intangibles that might be harder to place into a systematic equation of risks and returns. After you've done a careful analysis, step back. Maybe the crazy decision is the right one. Don't underestimate the power of deciding boldly. These essential truths help you to learn the brave way to make complex and critical decisions.

Truth to Power, the first-ever history of the U.S. National Intelligence Council (NIC), is told through the reflections of its eight Chairs in the period from the end of the Cold War until 2017. Co-editors Robert Hutchings and Gregory Treverton add a substantial introduction placing the NIC in its historical context going all the way back to the Board of National Estimates in the 1940s, as well as a concluding chapter that highlights key themes and judgments. This historic mission of this remarkable but little-known organization, now forty years old, is strategic intelligence assessment in service of senior American foreign policymakers. Its signature inside products, National Intelligence Estimates, are now accompanied by the NIC's every-four-years Global Trends. Unclassified, Global Trends has become a noted NIC brand, its release awaited by officials, academics and private sector managers around the world. Truth to Power tracks the NIC's role in providing strategic analysis on every major foreign policy issue confronting the United States during this consequential period. Chapters provide insider insights on the Balkan wars of the 1990s, the terrorist attacks of September 11, 2001, the invasion and occupation of Iraq in 2003, the nuclear weapons programs in Iran and North Korea, upheaval in the Middle East including the rise and fall of the Islamic State, the rise of China, and the Russia's turn toward aggression under Vladimir Putin. The book also assesses the NIC's newly expanded role in direct support to meetings of the National Security Council as well as its longstanding role in producing longer-range strategic intelligence.
