This book provides introductory coverage of growth and development throughout the lifespan. The content emphasizes normal aspects as well as the unique problems and health promotion needs of each age and stage of development. It features a strong health promotion theme structured around Healthy People 2020 objectives. Lifespan coverage from prenatal development to death helps students integrate concepts related to normal changes in each stage of the life cycle. Coverage of current research and trends in health care provide readers with the most up-to-date, accurate information. Health promotion and disease prevention, including Healthy People 2020 objectives, are highlighted throughout the book. Cultural content is highlighted throughout the book and in new Chapter 3: Cultural Considerations in Health Care to encourage students to consider cultural implications at every stage of development. Separate chapter on advanced old age and geriatrics (Chapter 14) discuss the theories, physiological changes, and psychological aspects of aging; health promotion and maintenance; and the role of health care providers in caring for the geriatric patient. All of this helps students understand how to maintain quality of life and promote health in advanced old age. Teaching techniques for every developmental stage are part of a consistent chapter format and provide age-appropriate patient education tips. Consistent chapter organization for each stage of growth and development makes information easy to access. Critical Thinking scenarios and questions appear at the end of each chapter to help students consider all variables when planning care across the lifespan. Student learning features include Objectives, Key Terms, Key Points, and Review Questions. Appendix A includes the FDA's Recommended Child and Adult Immunization Schedules, providing essential health promotion information. NEW Appendix B provides a Multilingual Glossary of Symptoms to enhance students' awareness of culturally sensitive care. Glossary includes definitions of Key Terms and additional terms help students review concepts and terminology at a glance. Bibliography is organized by chapter at the end of the book to facilitate additional research and study.

"With Making a Difference as its central theme, the Seventh Edition of this bestselling text recognizes that more than ever before, educators have the opportunity and ability to make a real difference in the educational experiences of their students with disabilities. Students and teachers have long relied on this comprehensive overview of the field of special education and the ways in which all teachers can help students with special needs to succeed in school and reach their full potential. The text is brimming with evidence-based practices, ready-to-use teaching tips, and up-to-the minute information about technology applications and contemporary inclusive practices?all tools that teachers can use with students of all abilities, from those who struggle to the most gifted. The text uses authentic stories from real people, current news events, and examples from contemporary popular culture to examine the positive effects of over 30 years of IDEA and many years of social activism on the lives of individuals with disabilities, their families, and the educators and professionals who work with them."--Publisher's website.

In a unique departure from traditional lifespan development texts, each chapter is divided into three modules, and in turn, each module is divided into several smaller sections. Consequently, students encounter material in smaller, more manageable chunks that optimize learning.

Providing a solid foundation in the normal development of functional movement, Functional Movement Development Across the Life Span, 3rd Edition helps you recognize and understand movement disorders and effectively manage patients with abnormal motor function. It begins with coverage of basic theory, motor development and motor control, and evaluation of function, then discusses the body systems contributing to functional movement, and defines functional movement outcomes in terms of age, vital functions, posture and balance, locomotion, prehension, and health and illness. This edition includes more clinical examples and applications, and updates data relating to typical performance on standardized tests of balance. Written by physical therapy experts Donna J. Cech and Suzanne "Tink" Martin, this book provides evidence-based information and tools you need to understand functional movement and manage patients' functional skills throughout the life span. Over 200 illustrations, tables, and special features clarify developmental concepts, address clinical implications, and summarize key points relating to clinical practice. A focus on evidence-based information covers development changes across the life span and how they impact function. A logical, easy-to-read format includes 15 chapters organized into three units covering basics, body systems, and age-related functional outcomes respectively. Expanded integration of ICF (International Classification of Function) aligns learning and critical thinking with current health care models. Additional clinical examples help you apply developmental information to clinical practice. Expanded content on assessment of function now includes discussion of participation level standardized assessments and assessments of quality-of-life scales. More concise information on the normal anatomy and physiology of each body system allows a sharper focus on development changes across the lifespan and how they impact function.

The seventh edition comes with significant revision of cognitive development throughout childhood, revised and updated chapters on adolescence, and more attention to emerging and early adulthood. It contains new research on everything from genetics to the timing of puberty, including brain development, life span disorders and cultural diversity.

A practically focused guide to effective counseling of all clients Human Development Across the Life Span is a practical guide to human growth and development, moving beyond theory to include real-world applications for counselors who work with clients. Written by recognized authorities in mental health counseling and counselor education, this book is fully aligned with the American Counseling Association's accreditation standards and includes contributions by well-known and respected academics and practitioners. Based on an extensive review of course syllabi across CACREP-accredited programs, this book is organized to follow the way courses are typically taught and follows a consistent structure including pedagogical elements that help students learn. After a thorough examination of essential concepts and theories of life span development, the book moves through each stage of human growth and development to provide expert insight, short case studies, and practical applications to counseling. The full Instructor's package provides a useful set of tools, including a Respondus test bank, PowerPoint slides, and an Instructor's Manual. This book is the only text on human growth and development that emphasizes the key implications and applications for counselors, providing useful information and the insights of real experts in each subject area. Understand the developmental milestones at each life stage Appreciate clients' perspectives to better facilitate appropriate interventions Work more effectively with clients of any age, from toddlers to seniors Tailor your

approach to meet the unique needs and abilities of each life stage As a counselor, you cannot approach a child's therapy the same way you approach an adult's. Even within each major category, each developmental stage includes a nuanced set of characteristics that, considered appropriately, will inform a more effective treatment plan. Human Development Across the Life Span is a comprehensive guide to understanding all of your clients, and providing the type of counseling that facilitates more positive outcomes.

Human Development & Performance Throughout the Lifespan, 2nd Edition is ideal for occupational therapy, physical therapy, and other rehabilitation disciplines. It provides a broad, occupation-based viewpoint of development and performance throughout all life stages with an emphasis on the factors that influence daily participation and optimal performance of desired daily life tasks. The authors use a life course conceptual model as an organizational foundation for clinical reasoning to help readers understand how to implement the activity- and participation-based goals and outcomes for therapy. Written by an occupational therapist and a physical therapist, the book incorporates chapters by leading experts in human development, giving users cutting-edge information and a wide range of perspectives. By integrating information from the International Classification of Function and Disability (ICF) with a developmental life-task perspective, the book gives both newcomers and experienced professionals an essential, contemporary frame of reference.
