[Section 18-3 Kingdoms and Domains](#)

The key difference between kingdom and domain is that the kingdom is one of the five major groups of living organisms while the domain is one of the three taxonomic categories of living organisms above the kingdom level. Thus, domain is a category above the kingdom level. Accordingly, there are three domains namely bacteria, archaea and eukarya. On the other hand, the kingdom is a major category of living organisms below the domain level. There are five kingdoms namely monera, protista ...
