This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the

process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and

Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

forces reproduced in the digital era and challenge celebratory readings of digital technology.

Most entrepreneurship and small business textbooks contain few, if any, cases that an instructor can use with students and illustrate important theories or topics from the course. This book contains cutting-edge case studies that illustrate key problems confronting contemporary entrepreneurs. Set in familiar business environments, this original set of cases provides useful insights into the experiences of real-world entrepreneurs for classroom environments.

Craft practice has experienced a sharp rise in

popularity since the late 2000s, partly through the 'aura of the analogue' and the desire for authentic, handmade products in an increasingly fast paced, digitalised world (Luckman, 2015) but also because of digital platforms such as Etsy and social media enabling 'anyone' to become a craft entrepreneur. This book brings together historical, policy and individual narratives to inform a broad understanding of craft entrepreneurship. Drawing on case studies from around the world, Craft Entrepreneurship considers questions of identity, community, and the digital in craft entrepreneurship. In doing so, it finds craft activities to be positioned between or across the arts, heritage, notions of a bohemian lifestyle and the

challenges of micro-entrepreneurship. By engaging with the contradictions and fragility of sustaining a craft practice, the chapters in this book contribute to different perspectives for entrepreneurship studies. The contributions to this volume illustrate the craft entrepreneurs' identity, motivation and sense of creative purpose through their craft, as these collide with the tensions brought about through entrepreneurship.
