Intended as an introductory course, this text contains updated institutional material which is international in scope and deals with the effects of electronic commerce. It provides tips, questions and answers and special features.

Integrating financial theory and practice, this text explores the theory of finance as it relates to a corporation's investment in assets, financing and dividends. It explains ways in which analytical techniques are brought to bear on financial decision making and supplies the institutional material necessary to aid in student's understanding of the environment in which financial decisions are made.

Known for its real-world examples and effective problem sets, this undergraduate corporate finance course is now in its 9th edition and includes a student resource CD-ROM, with Excel tutorials and additional practice problems. The tenth edition features InfoTrac college edition access.

Continuing the four goals from the first edition, i.e. helping students to make good financial decisions, providing a solid text for the introductory MBA course, motivating students by demonstrating finance is relevant and interesting, and presenting the material clearly, this Tenth Edition promises to be the best yet. Written by a highly-acclaimed, best selling, author team, this text remains the only MBA-level text to present a balance of financial theory and applications.
