Financing renewable electricity in the resource-rich ...

The European Commission has published today the rules for a new EU Renewable Energy Financing Mechanism, to apply from the start of 2021. This Mechanism will make it easier for Member States to work together to finance and deploy renewable energy projects – either as a host or as a contributing country. The energy generated will count towards the renewable energy targets of all participating countries and feed into the European Green Deal ambition of reaching carbon neutrality by 2050.
