For Harley-Davidson aficionados, the very name Sportster conjures an image of a fire-breathing mechanical beast scorching the world ' s tarmac image the Sportster itself often does not live up to. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz

Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head.

In 1957, The Motor Company, as they call Harley-Davidson in Milwaukee, was in trouble. The big twins were too big, the small two-stroke single was too small, and a surge of imports had taken the sporting market from the under-powered Model K. It was time for something new and different. It was time for the Sportster. Never has a motorcycle been more aptly named. The Sportster kept the K's best features, borrowed the improvements of the imports, threw in some homemade hot rodding, and before you could say Superbike-a term invented to describe the XLCH-the Sportster was making history, setting sales and speed records, and introducing people to the sport of motorcycling and the mystique of Harley-Davidson. The history is still

going on. This book tells how and why, in sequence, from the circumstances and models that preceded the XL through to the 1200 Evo, with its five speeds and belt drive. On the way, there are in-depth looks at the race-ready XLC that began the Superbike era (and took even the factory by surprise), at the radical Café Racer and super-sport Buell, and at the price-buster XLX that taught the imports the value of the dollar. books Enthusiasts Series. It tells the story of one of Italy's premiere post-war marques. With a history steeped in aviation, including the MC72 World Speed Record holder and World War II fighters, Aermacchi began building motorcycles in 1950. At the 1956 Milan Show, the futuristic Chimera, an ohv horizontal single with enclosed bodywork was launched. Later in the decade the Chimera was 'undressed' to create some of Italy's best sports and racing machines, including the Ala Verde and the Ala d'Oro. In 1960 Harley Davidson bought 50% of Aermacchi, and then in 1978 the Varese factory was sold to Cagiva. A number of Aermacchi personalities have contributed to this book, giving it additional authority.
