The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

For the many categories of EFL teachers throughout the world, this book examines the main principles which concern them. By drawing upon their experience the authors have indicated a modern and practical approach.

This book features eighteen articles addressing issues such as: how language is learned, and teaching grammar through writing, across the grades.

With questions and answer sections throughout, this book helps you to improve your written and spoken English through understanding the structure of the English language. This is a thorough and useful book with all parts of speech and grammar explained. Used by ELT self-study students.
