Ionic Bonding Worksheet Answers | Mychaume.com

different ionic compound. The ionic compounds contain ammonium, calcium, nickel, potassium, or zinc as the cation and bromide, fluoride, hydroxide, nitrate, or sulfate as the anion. No single ion is repeated. Using the clues below, determine the ionic compound contained in each student's solution and its molar mass.

An Ionic Compound Logic Puzzle - Just Only

Ionic Bonding Puzzle Activity. Introduction. When metals and non-metals chemically react, the atoms will tend to form . ions. or charged atoms. Ions form because . electrons. are either gained or lost. Metals will generally form . cations. or positive ions, since they tend to . donate. electrons. Non-metals will form . anions. or negative ions ...

Ionic Bonding Model Cards - CToThe3Chemistry

Lab: Ionic Puzzle Pieces Background: The formulas of ionic compounds can be determined by making sure their oxidation states (charges) add up to zero (neutral). This can be more easily visualized with puzzle pieces. An element with an oxidation state of +1 is represented by a puzzle piece with one tab jutting out (representing the electron it ...
