Seeks to establish what we now know (and do not know) about Earlier Iron Age communities in Britain and their neighbours on the Continent. The authors look at how communities of the Late Bronze Age transform into those of the Earlier Iron Age, and how we understand the social changes of the later first millennium BC.

For almost forty years the study of the Iron Age in Britain has been dominated by Professor Sir Barry Cunliffe. Between the 1960s and 1980s he led a series of large-scale excavations at famous sites including the Roman baths at Bath, Fishbourne Roman palace, and Danebury hillfort which revolutionized our understanding of Iron Age society, and the interaction between this world of 'barbarians' and the classical civilizations of the Mediterranean. His standard text on Iron Age Communities in Britain is in its fourth edition, and he has published groundbreaking volumes of synthesis on The Ancient Celts (OUP, 1997) and on the peoples of the Atlantic coast, Facing the Ocean (OUP, 2001). This volume brings together papers from more than thirty of Professor Cunliffe's colleagues and students to mark his retirement from the Chair of European Archaeology at the University of Oxford, a post which he has held since 1972. The breadth of the contributions, extending over 800 years and ranging from the Atlantic fringes to the eastern Mediterranean, is testimony to Barry Cunliffe's own extraordinarily wide interests.

Widely regarded as major visible field monuments of the Iron Age, hillforts are central to an understanding of later prehistoric communities in Britain and Europe. Harding reviews the changing perceptions of hillforts and the future prospects for hillfort research, highlighting aspects of contemporary investigation and interpretation.

The Earlier Iron Age (c. 800-400 BC) has often eluded attention in British Iron Age studies. Traditionally, we have been enticed by the wealth of material from the later part of the millennium and by developments in southern England in particular, culminating in the arrival of the Romans. The result has been a chronological and geographical imbalance, with the Earlier Iron Age often characterised more by what it lacks than what it comprises: for Bronze Age studies it lacks large quantities of bronze, whilst from the perspective of the Later Iron Age it lacks elaborate enclosure. In contrast, the same period on mainland Europe yields a wealth of burial evidence with links to Mediterranean communities and so has not suffered in quite the same way. Gradual acceptance of this problem over the past decade, along with the corpus of new discoveries produced by developer-funded archaeology, now provides us with an opportunity to create a more balanced picture of the Iron Age in Britain as a whole. The twenty-six papers in the book seek to establish what we now know (and do not know) about Earlier Iron Age communities in Britain and their neighbours on the Continent. The authors engage with a variety of current research themes, seeking to characterise the Earlier Iron Age via the topics of landscape, environment, and agriculture; material culture and everyday life; architecture, settlement, and social organisation; and with the issue of transition - looking at how communities of the Late Bronze Age transform into those of the Earlier Iron Age, and how we understand the social changes of the later first millennium BC. Geographically, the book brings together recent research from regional studies covering the full length of Britain, as well as taking us over to Ireland, across the Channel to France, and then over the North Sea to Denmark, the Low Countries, and beyond.

The first millenium BC was a time of dramatic change in Europe, dominated by the emergence of Rome as a mega-state. Britain, on the periphery of these developments, witnessed huge social and economic change, seeing the end of the Bronze Age cycle of subsistence farming and the beginning of a more complex society which was to alter very little until the oceans were conquered in the 16th century. This book is a detailed study of these developments.
