“Nonstop sexual tension crackles off the page” (Laura Kaye) in the sizzling final installment in the New York Times and USA TODAY bestselling Marriage to a Billionaire saga by Jennifer Probst. Her sisters have found wedded bliss with their wealthy, wonderful dream men, but not Julietta Conte. She’s stayed on terra firma as top executive of the family’s corporation, La Dolce Famiglia bakery. Work is her passion, and her trendy Milan apartment her sanctuary . . . until Sawyer Wells, a masculine masterpiece in a suit, lures her out of hiding with an irresistible offer: an exclusive partnership with his international chain of boutique hotels. Julietta’s been burned before—and trusting her brother-in-law’s friend, whose powerful gaze alone has her rethinking the best use of a conference room, is the riskiest proposition. But with a once-in-a-career chance to take the bakery global, will she mix stone-cold business with red-hot seduction?

This book focuses on an emerging, central issue in molecular genetics and the development of eukaryotes: the control of gene expression by small species of RNA. As an exciting new field of endeavor, it is the first book by a single author to deal comprehensively with RNA silencing. The book provides the historical background of the field preceding the seminal work by Fire and associates in 1998 on the impact of small double-stranded RNA on the expression of nematode genes, which is considered the beginning of RNA silencing research. RNA silencing is described in a wide range of plants and animals including protozoa, simple metazoa, insects, non-mammalian vertebrates, and mammals. In each case the experimental results are provided with the accompanying background and with illustrations. There is also an appendix on the prospective use of RNA silencing in gene therapy, which is intended as a guide for investigators wishing to explore this possibility.

Schooldays at St Clare's are never dull for twins Pat and Isabel O'Sullivan in Enid Blyton's much-loved boarding school series. In book five it's time for a new head girl. There are plenty of candidates, but after a terrible accident, and an hilarious school play, the true leaders are revealed. Expect more mischief at St Clare's! Between 1941 and 1946, Enid Blyton wrote six novels set at St Clare's. Books 5, 6 and 9 are authorised sequels of the series written by Pamela Cox and feature storylines set in between the original Blyton novels. These books were published in 2000/2008 and are unillustrated.

In this book, after discussing the fundamental problems of current science and other philosophic concepts, beginning with controversies between Heraclitus and Parmenides, Ilya Prigogine launches into a message of great hope: the future has not been determined. Contrary to globalisation and the apparent contemporary mass culture society, individual behaviour is beginning to increasingly become the key factor which governs the evolution of both the world and society as a whole. It is a message that challenges existing widespread views, implicitly or explicitly, through mass communication; moreover the importance of the individual's actions implies a reflection of each person on the responsibilities that each one assumes when taking or acting upon a decision. This responsibility is associated with the freedom of thought as well as a critical analysis of fashions, customs, preconceived ideas, and ideologies, externally imposed: exactly contrary to the ideas of those who wish us to be ?perfect consumers? in a world dominated only by monetary wealth. Challenging this drive towards the elimination of freedom of thought in the individual is now imperative if we are to save man and his planet from catastrophe, which seems to be ever imminent and (unfortunately) irreversible. This last book of Ilya Prigogine provides a small, disputable, but nonetheless valuable contribution towards that end.
