Assistive Technology Assessment Handbook, Second Edition, proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to re-conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate, and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products

autonomous force, capable of acting independently and not simply reacting to the depredations of capitalism, Harry Cleaver brings this vision up to date, interpreting capitalism ' s latest crises and demonstrating how ordinary people can, and do, rupture the smooth functioning of the system that exploits them.

The intense bonds among the king and his family, friends, lovers, and entourage are the most enticing and intriguing aspects of Alexander the Great ' s life. The affective ties of the protagonists of Alexander ' s Empire nurtured the interest of the ancient authors, as well as the audience, in the personal life of the most famous men and women of the time. These relations echoed through time in art and literature, to become paradigm of positive or negative, human behavior. By rejecting the perception of the Macedonian monarchy as a positivist king-army based system, and by looking for other political and social structures Elizabeth Carney has played a crucial role in prompting the current re-appraisal of the Macedonian monarchy. Her volumes on *Women and Monarchy in Ancient Macedonia* (University of Oklahoma Press, 2000), *Olympias: Mother of Alexander the Great* (Routledge, 2006), *Arsinoë of Egypt and Macedon: A Royal Life* (Oxford University Press, 2013) have been game-changers in the field and has offered the academic world a completely new perspective on the network of relationships surrounding the exercise of power. By examining Macedonian and Hellenistic dynastic behavior and relations, she has shown the political yet tragic, heroic thus human side, thus connecting Hellenistic political and social history. Building on the methodological approach and theoretical framework engendered by Elizabeth Carney ' s research, this book explores the complex web of personal relations,

inside and outside the oikos (family), governing Alexander ' s world, which sits at the core of the inquiry into the human side of the events shedding light light on the personal dimension of history. Inspired by Carney ' s seminal work on Ancient Macedonia, the volume moves beyond the traditionally rationalist and positivist approaches towards Hellenistic antiquity, into a new area of humanistic scholarship, by considering the dynastic bloodlines as well as the affective relations. The volume offers a discussion of the intra and extra familial network ruling the Mediterranean world at the time of Philip and Alexander. Building on present scholarship on relations and values in Hellenistic Monarchies, the book contributes to a deeper historical understanding of the mutual dialogue between the socio-cultural and political approaches to Hellenistic history.

This collection of articles provides theoretical foundations and perspectives for language attrition research. Its purpose is to enable investigations of L1 attrition to avail themselves more fully and more fundamentally of the theoretical frameworks that have been formulated with respect to SLA and bilingualism. In the thirteen papers collected here, experts in particular disciplines of bilingualism, such as neurolinguistics, formal linguistics, contact linguistics and language and identity, provide an in-depth perspective on L1 attrition which will make the translation of theory to hypothesis easier for future research.

Translating Culture Specific References on Television provides a model for investigating the problems posed by culture specific references in translation, drawing on case studies that explore the translational norms of contemporary Italian dubbing practices. This monograph makes a distinctive contribution to the study of audiovisual translation and culture specific references in its focus on dubbing as opposed to subtitling, and on contemporary television series, rather than cinema. Irene Ranzato ' s research involves detailed analysis of three TV series dubbed into Italian, drawing on a corpus of 95 hours that includes nearly 3,000 CSR translations. Ranzato proposes a new taxonomy of strategies for the translation of CSRs and explores the sociocultural, pragmatic and ideological implications of audiovisual translation for the small screen.

This volume explores the tremendous influence of Plato ' s Phaedrus on the philosophical, religious, scientific and literary discussions in the West. Ranging from Plato ' s first readers, over the Church Fathers and the Platonic commentators, to Byzantine and Renaissance thinkers, the papers collected here introduce the reader to the first two millennia of the dialogue ' s reception history. Thirteen contributions by both junior and established scholars study the engagement with the Phaedrus by such major figures as Aristotle, Galen, Origen, Clemens of Alexandria, Plotinus, Augustine, Proclus, Psellus, Ficino, Erasmus, and many others. Together, they cover the wide range of topics discussed in the dialogue: the value of myth and allegory, religion and theology, love and beauty, the soul and its immortality, teaching and learning, metaphysics and epistemology, rhetoric and dialectic, as well as the role and the limits of writing. By placing the dialogue in this broad perspective, the volume will appeal to readers interested in the Phaedrus itself, as well as to classicists, literary theorists, and historians of philosophy, science and religion concerned with the dialogue ' s reception history and its main protagonists.
