No question that one of the more significant developments in sport diving over the past 15 years is the fast rise of technical diving and the use of rebreathers. But they're complex to use and fraught with hazards for less-than-precise divers. Enter Mastering Rebreathers, 2nd Edition, by Jeff Bozanic, a long-time technical dive instructor, who published the first edition of this book in 2002.

This book summarizes what is known about mesophotic coral ecosystems (MCEs) geographically and by major taxa. MCEs are characterized by light-dependent corals and associated communities typically found at depths ranging from 30-40 m. and extending to over 150 m. in tropical and subtropical ecosystems. They are populated with organisms typically associated with shallow coral reefs, such as macroalgae, corals, sponges, and fishes, as well as specialist species unique to mesophotic depths. During the past decade, there has been an increasing scientific and management interest in MCEs expressed by the exponential increase in the number of publications studying this unique environment. Despite their close proximity to well-studied shallow reefs, and the growing evidence of their importance, our scientific knowledge of MCEs is still in its early stages. The topics covered in the book include: regional variation in MCEs; similarities and differences between mesophotic and shallow reef taxa, biotic and abiotic conditions, biodiversity, ecology, geomorphology, and geology; potential connectivity between MCEs and shallow reefs; MCE disturbances, conservation, and management challenges; and new technologies, key research questions/knowledge gaps, priorities, and future directions in MCE research.

Considered an essential resource by many in the field, Diving and Subaquatic Medicine remains the leading text on diving medicine, written to fulfil the requirements of any general physician wishing to advise their patients appropriately when a diving trip is planned, for those accompanying diving expeditions or when a doctor is required to assess

Written by two experts in diving physiology and medicine, this comprehensive resource will help you manage each stage of a dive more safely and successfully. Whether you're on the surface or bottom, in the descent or ascent, you'll know exactly what to do and when to do it. With information on everything from on-gassing and off-gassing to first response interventions for medical problems, Diving Science is as essential as a wetsuit for your next dive.

The number of ships that have met their ends off Nova Scotia's rugged coast is almost limitless. Their stories and histories are at once both interesting and tragic, and in some cases, mysterious. Collected here are the accounts of just a few of these events, footnotes in the long maritime history of the province. The tragedies of the past have become the playgrounds of divers, who visit these underwater time-capsules, not for any monetary gain, but rather in the development of a deep appreciation of maritime history. It is the history of those who came before, braved unimaginable hardship, laid the foundations of Canada, and defended its freedom. There is something about touching a shipwreck that makes history much more real and powerful. Wreck Diving Tales is a compelling read for divers, maritime history lovers, and armchair adventurers alike.

Chris Boardman is the 2017 winner of the Cross Sports Cycling Book of the Year for his autobiography Triumphs and Turbulence. 'The true inspiration was that Olympic gold won by Chris Boardman in Barcelona... I was so in awe of Chris Boardman' Sir Bradley Wiggins You may know him as the much-loved co-presenter of ITV's Tour de France coverage or enjoyed his BBC Olympic coverage, but beyond the easy charm Chris Boardman is one of our greatest, most inspiring cyclists. Boardman's lone achievements in the 80s and 90s – Olympic track gold, the world hour record, repeatedly claiming the yellow jersey in the Tour de France – were the spark that started the modern era for British cycling. His endeavours both on and off the bike have made him the founding father of current golden generation – without him there would simply be no Hoy, Wiggins or Cavendish. It is a story full of intrigue: from Olympic success, to the famous duels with Graeme Obree and the insanity of the Tour de France. Chris became a legend for his combination of physical ability and technical preparation, almost single-handedly taking British cycling from wool shirts and cloth caps into the era of marginal gains. Indeed, after his career on the bike ended, a new chapter began as the backroom genius behind GB cycling. As head of the R&D team known as The Secret Squirrel Club, Chris has been responsible for the technical innovations that made the difference in 2012 and developed Boardman Bikes, which has become the country's bestselling premium bike range.
