Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

What were the causes, characteristics, and effects of the great flood of migration over the Ural Mountains into Siberia in the late 19th and 20th centuries? The author studies the background conditions fostering the migration and then the migration itself: its actual course; the establishment of settlements; the legal, political, and economic factors involved. It is the thesis of this book that the Siberian migration was related to other developments in Russian society of late Tsarist times which were tending to break clown legal barriers between social classes and to provide all groups with greater access to economic opportunity. Originally published in 1957. This work adopts a comparative approach to explore interrelations between two phenomena which, so far, have rarely been examined and analysed together, namely the dynamics of diaspora and minority formation in Central and Eastern Europe on the one hand, and the diaspora migration on the other.

Russia has a very large pool of economic migrants, up to 25% of the workforce according to some estimates. Although many migrants, many from former Soviet countries which are now independent, entered Russia legally, they frequently face bureaucratic obstacles to legal employment and Russian citizenship, factors which have led to a very large "shadow economy". This book presents a comprehensive examination of migrant labour in Russia. It describes the nature of migrant labour, explores the shadow economy and its unfortunate consequences, and discusses the rise of popular sentiment against migrants and the likely impact. The book also sets the Russian experiences of migrant labour in context, comparing the situation in Russia with that in other countries with significant migrant labour workforces.

Since the Russian annexation of Crimea in 2014 and the beginning of the war in Donbas, Eastern Europe has been facing a migration crisis. The aim of this collection is to shed light on this forgotten migrant crisis at the European Union's doorstep and make sense of the various migration processes in and out of Ukraine and Russia.

When nations divide, whether peacefully or through violence, there are many issues beyond politics to negotiate in the aftermath. Understanding the concerns that are likely to confront separated states is vital in establishing stability in new states. Examining case studies in Africa, Europe, and Asia, international security expert Gregory Treverton provides a detailed guide to recent national divisions that range from the partition of India to the secession of Eritrea from Ethiopia. *Dividing Divided States* offers an overview of the ways different states have handled such contentious issues as security and citizenship, oil and water resources, assets and liabilities, and the rights of pastoralist groups. In each case, Treverton considers how the root causes of secession—such as long-simmering conflicts, nationalist politics, and changed geopolitical circumstances—impact the effectiveness of policies that form new nations. *Dividing Divided States* serves as both a source of ideas for future secession policies and a reminder that, while the motivations and outcomes of secessions may differ widely, separating states face similar challenges in dividing populations, natural resources, and state resources. This book offers considered and cautionary lessons for policy makers and policy researchers alike.

In the first book to trace the Russian state's citizenship policy throughout its history, Lohr argues that to understand the citizenship dilemmas Russia faces today, we must return to the less xenophobic and isolationist pre-Stalin period—before the drive toward autarky after 1914 eventually sealed the state off from Europe.
