Elizabeth Taylor has never been short on star power, but in this unprecedented biography, the spotlight is entirely on her—a spirited beauty full of magic, professional daring, and wit. Acclaimed biographer William Mann follows Elizabeth Taylor publicly as she makes her ascent at MGM, falls into (and out of) marriages, wins Oscars, fights studio feuds, and combats America's conservative values with her decidedly modern love affairs. But he also shines a light on Elizabeth's rich private life, revealing a love for her craft and a loyalty to the underdog that fueled her lifelong battle against the studio system. Swathed in mink, disposing of husbands but keeping the diamonds—this is Elizabeth Taylor as she lived and loved, breaking and making the rules in the game of supreme celebrity.

This book discusses blind investigation and recovery of digital evidence left behind on digital devices, primarily for the purpose of tracing cybercrime sources and criminals. It presents an overview of the challenges of digital image forensics, with a specific focus on two of the most common forensic problems. The first part of the book addresses image source investigation, which involves mapping an image back to its camera source to facilitate investigating and tracing the source of a crime. The second part of the book focuses on image-forgery detection, primarily focusing on “copy-move forgery” in digital images, and presenting effective solutions to copy-move forgery detection with an emphasis on additional related challenges such as blur-

invariance, similar genuine object identification, etc. The book concludes with future research directions, including counter forensics. With the necessary mathematical information in every chapter, the book serves as a useful reference resource for researchers and professionals alike. In addition, it can also be used as a supplementary text for upper-undergraduate and graduate-level courses on “ Digital Image Processing ” , “ Information Security ” , “ Machine Learning ” , “ Computer Vision ” and “ Multimedia Security and Forensics ” .
