[WebLogic Server Administration Guide - Oracle](#)

The Oracle Application Server 10g, consists of an integrated, standards-based software platform. It forms part of Oracle Corporation's Fusion Middleware technology stack. The heart of Oracle Application Server consists of Oracle HTTP Server and OC4J which deploys Java EE-based applications. The latest version of OC4J offers full compatibility with the Java EE 1.4 specifications. Oracle Application Server became the first platform designed for grid computing as well as with full life-cycle support

Re: Application server administrator. Asif M. Naqvi Feb 21, 2009 7:08 PM (in response to 683605) In my humble opinion, since the advent of 10g family of Oracle Application Server, a new role of Application Server Administrator has emerged which is different from the role of a DBA. AS Administrator administers the AS instances, environments, components and their integrated configurations whereas the DBA looks after the DB administration and management.
