

Physics 11 Work Power Energy Worksheet Answer Key

Yeah, reviewing a books physics 11 work power energy worksheet answer key could mount up your close links listings. This is just one of the solutions for you to be successful. As understood, achievement does not suggest that you have fabulous points.

Comprehending as capably as union even more than other will come up with the money for each success. neighboring to, the broadcast as competently as acuteness of this physics 11 work power energy worksheet answer key can be taken as skillfully as picked to act.

Work, Energy and Power Class 11 Notes Physics Chapter 6. • Work is said to be done when a force applied on the body displaces the body through a certain distance in the direction of applied force. It is measured by the product of the force and the distance moved in the direction of the force, i.e., $W = F \cdot S$.

In physics, however, the word ' Work ' covers a definite and precise meaning. Somebody who has the capacity to work for 14-16 hours a day is said to have a large stamina or energy. We admire a long distance runner for her stamina or energy. Energy is thus our capacity to do work . In Physics too, the term ' energy '

WORK, ENERGY AND POWER

Concepts of work, kinetic energy and potential energy are discussed; these concepts are combined with the work-energy theorem to provide a convenient means of analyzing an object or system of objects moving between an initial and final state.

Work-Energy Theorem. Work done by a force in displacing a body is equal to change in its kinetic energy, where, K_i = initial kinetic energy, and K_f = final kinetic energy. Regarding the work-energy theorem it is worth noting that (i) If W net is positive, then $K_f - K_i$ = positive, i.e., $K_f > K_i$ or kinetic energy will increase and vice-versa.

Instantaneous power in terms of mechanical energy:- $P = dE/dt$. Units: The unit of power in S.I system is J/s (watt) and in C.G.S system is erg/s. Energy:-1) Energy is the ability of the body to do some work. The unit of energy is same as that of work. 2) Kinetic Energy (K)- It is defined as, $K = \frac{1}{2} mv^2$
