~~Development~~
it in certain other ways. This is so because the relationship between population growth and economic development is intricate, complex and interacting. On the positive side, an increasing population means an increase in the supply of labour— a basic factor of production. And growth of population and labour supply has all along been one major source of growth in recorded history.

~~Population Growth and Economic Development~~

Population growth plays a conflicting role in the development process of a country. It helps economic development and it retards economic development. To the Greek philosophers, about 2,500 years ago, population growth was undesirable as it adversely affects economic development.

~~Development: A Close View~~

In developing areas of the world, population growth can seem to have a positive effect on local economies. But is this growth always a good thing? Additional people provide a workforce necessary to generate goods and services. However, in some cities, rapid growth leads to skyrocketing housing prices and unmanageable traffic.

~~The Effects of Population Growth on Economic Development ...~~

The relationship between population growth and economic development can be measured by looking at the impact of population growth on economic development and vice-versa. The phases of Demographic Transition theory can be considered looking at three different time frames i.e. before the transition, during the transition and post-transition to better
