Probability Questions and Answers / Study.com

Find the probability of getting a queen. Solution

Read Book Probability

Answer Key

The sample space S of the experiment in question 7 is shown above (see question 6). Let E be the event "getting a Queen". An examination of the sample space shows that there are 4 "Queens" so that $n(E) = 4$ and $n(S) = 52$.

Read Book Probability

Answer Key

Hence the probability of event E occurring is given by $P(E) = 4 / 52 = 1 / 13$
