Jonathan Boston and Simon Chapple have written the definitive book on child poverty in New Zealand. Dr Russell Wills, Children's Commissioner Between 130,000 and 285,000 New Zealand children live in poverty, depending on the measure used. These disturbing figures are widely discussed, yet often poorly understood. If New Zealand does not have "third world poverty", what are these children actually experiencing? Is the real problem not poverty but simply poor parenting? How does New Zealand compare globally and what measures of poverty and hardship are most relevant here? What are the consequences of this poverty for children, their families and society? Can we afford to reduce child poverty and, if we can, how? Jonathan Boston and Simon Chapple look hard at these questions, drawing on available national and international evidence and speaking to an audience across the political spectrum. Their analysis highlights the strong and urgent case for addressing child poverty in New Zealand. Crucially, the book goes beyond illustrating the scale of this challenge, and why it must be addressed, to identifying real options for reducing child poverty. A range of practical and achievable policies is presented, alongside candid discussion of their strengths and limitations. These proposals for improving the lives of disadvantaged children deserve wide public debate and make this a vitally important book for all New Zealanders.

This timely book brings clarity to the debate on the new legal phenomenon of environmental border tax adjustments. It will help form a better understanding of the role and limits these taxes have on environmental policies in combating global environmental challenges, such as climate change.

This book addresses the international legal obligation to protect economic, social, and cultural human rights in times of armed conflict and other situations of armed violence. These rights provide guarantees to individuals of their fundamental rights to work, to an adequate standard of living (food, water, housing), to education, and to health. Armed violence can take many forms, from civil unrest or protest and other forms of internal disturbances and tensions to higher levels of violence that may amount to armed conflict, whether of an international or of a non-international character. However, in all such cases the protection of ESC rights is sorely challenged. Situations of actual or potential violence present a number of challenges to the application and implementation of human rights law in general and socio-economic rights obligations more specifically. This book sets out the legal framework, defining what constitutes a minimum universal standard of human rights protection applicable in all circumstances. It assesses the concept and content of ESC rights' obligations, and evaluates how far they can be legally applicable in various scenarios of armed violence. By looking at the specific human rights treaty provisions, it discusses how far ESC rights obligations can be affected by practical and legal challenges to their implementation. The book addresses the key issues facing the protection of such rights in times of armed conflict: the legal conditions to limit ESC rights on security grounds, including the use of force; the extraterritorial applicability of international human rights treaties setting out ESC rights; the relationship between human rights law and international humanitarian law; and the obligations of non-state actors under human rights law and with particular relevance to the protection of ESC rights. The book assesses the nature of these potential challenges to the protection of ESC rights, and offers solutions to reinforce their continued application.

The city of Rio de Janeiro has been an "Olympic champion" in housing prices over the past decade . The intense process of real estate appreciation in the city in recent years has primarily been sustained by the construction work associated with the urban reforms currently underway, and the expectations related to a cluster of events, particularly the FIFA World Cup in 2014 and the Olympic Games in 2016. Research and surveys about urban trends in Rio de Janeiro reflect some particularities about the process of capitalist production of space, and how a market-oriented outlook has been reemphasised in the city, mainly during the current municipal administration (beginning in 2009), at the expense of its citizens' rights. In this process, the residents who lose their houses as a result of the appreciation process do not enjoy the benefits that it brings about. On the contrary, they are marginalised in the reorganisation of how the urban space is occupied and appropriated. This book intends to establish connections between urbanisation activities, political projects and processes of intervention in the urban territory. Our aim is to set out the possible relationships between expropriations, removals, new housing developments, security policies, large-scale projects for the provision of public, sporting and urban mobility facilities, along with a process of producing and adding value to land based on the exclusion and elimination of a portion of the population from these localities. In other words, we will investigate the role of the state and other social and economic actors in constructing these new ventures in Rio de Janeiro.

The Kurds, once marginal in the study of the Middle East and secondary in its international relations, have moved to centre stage in recent years. The contributors to The Kurdish Question Revisited offer insights into how this once seemingly intractable, immutable phenomenon is being transformed amid the new political realities of the Middle East.

Das Buch ist eine Analyse von Aufstieg und Fall des sowjetischen Herrschaftssystems in dem Gebiet, das zur Zeit des Kalten Krieges "Osteuropa" genannt wurde, und der Rolle, die das Deutschlandproblem dabei gespielt hat. Gestützt auf die Auswertung neuer Quellen aus den Partei- und Staatsarchiven ehemals kommunistischer Länder rekonstruiert es die folgende Entwicklung: die Teilung Deutschlands und dabei die Rolle der Sowjetunion unter Stalin; das eiserne Festhalten seiner Nachfolger an der Teilung; ihr zunehmendes Bewusstsein der hohen Kosten, welche die Aufrechterhaltung des imperialen Systems in Ostmitteleuropa verursacht; der Fehlschlag ihrer Anstrengungen, die wachsende wirtschaftliche und finanzielle Abhängigkeit der DDR von der Bundesrepublik zu verhindern; und schließlich die Gründe dafür, warum Gorbatschow die Auflösung des sowjetischen Herrschaftsbereichs in Ostmitteleuropa hinnahm und sogar der Mitgliedschaft des wiedervereinigten Deutschlands in der Nato zustimmte. "Angesichts der russischen Okkupation der Krim, der anhaltenden Krise in der Ostukraine und der dadurch ausgelösten Gegenreaktionen von NATO und EU scheint sich der Kalte Krieg in Europa zurückgemeldet zu haben. Geogimeter kann der Zeitpunkt für die überarbeitete Neuauflage des sich inzwischen zu einem Standardwerk entwickelten Buches von Hannes Adomeit nicht sein. Seine profunde Kenntnis und Auseinandersetzung mit sowjetischer und russischer Politik seit fünf Jahrzehnten und sein Zugang zu neuem russischen Archivmaterial qualifiziert ihn zu einem der besten und erfahrensten Experten auf internationaler Ebene. Wer die sowjetische Politik nach dem II. Weltkrieg bis zur Wiedervereinigung Deutschlands und ihre Implikationen für die letzten 25 Jahre verstehen will, kommt an Adomeits Buch und seiner analytischen Brillanz nicht vorbei". Prof. Dr. h.c. Horst Teltschik, September 2015 "Of all of the analyses of the fall of the Soviet Union and reunification of Germany, Hannes Adomeit's 1998 classic, "Imperial Overstretch", has stood the test of time. Its re-publication here by Nomos, with some modest updates by the author, will be welcomed by scholars, students, the policy community, and the informed public, as a trenchant interpretation of what happened to the "Soviet bloc", but also as an introduction to the assertive imperial politics of Vladimir Putin and the Russian Federation." Norman M. Naimark, Stanford University, November 2015

The iron element (Fe) is strictly required for the survival of most forms of life, including bacteria, plants and humans. Fine-tuned regulatory mechanisms for Fe absorption, mobilization and recycling operate to maintain Fe homeostasis, the disruption of which leads to Fe overload or Fe depletion. Whereas the deleterious effect of Fe deficiency relies on reduced oxygen transport and diminished activity of Fe-dependent enzymes, the cytotoxicity induced by Fe overload is due to the ability of this metal to act as a pro-oxidant and catalyze the formation of highly reactive hydroxyl radicals via the Fenton chemistry. This results in unfettered oxidative stress generation that, by inducing protein, lipid and DNA oxidation, leads to Fe-mediated programmed cell death and organ dysfunction. Major and systemic Fe overloads occurring in hemochromatosis and Fe-loading anemias have been extensively studied. However, localized tissue Fe overload was recently associated to a variety of pathologies, such as infection, inflammation, cancer, cardiovascular and neurodegenerative disorders. In keeping with the existence of cross-regulatory interactions between Fe homeostasis and the pathophysiology of these diseases, further investigations on the mechanisms that provide cellular and systemic adaptation to tissue Fe overload are instrumental for future therapeutic approaches. Thus, we encourage our colleagues to submit original research papers, reviews, perspectives, methods and technology reports to contribute their findings to a current state of the art on a comprehensive overview of the importance of iron metabolism in pathophysiologic conditions.
