This volume, developed by the Observatory together with OECD, provides an overall conceptual framework for understanding and applying strategies aimed at improving quality of care. Crucially, it summarizes available evidence on different quality strategies and provides recommendations for their implementation. This book is intended to help policy-makers to understand concepts of quality and to support them to evaluate single strategies and combinations of strategies.

Stepped-up efforts to ferret out health care fraud have put every provider on the alert. The HHS, DOJ, state Medicaid Fraud Control Units, even the FBI is on the case -- and providers are in the hot seat! In this timely volume, you'll learn about the types of provider activities that fall under federal fraud and abuse prohibitions as defined in the Medicaid statute and Stark legislation. And you'll discover what goes into an effective corporate compliance program. With a growing number of restrictions, it's critical to know how you can and cannot conduct business and structure your relationships -- and what the consequences will be if you don't comply.

Guidelines for the clinical practice of medicine have been proposed as the solution to the whole range of current health care problems. This new book presents the first balanced and highly practical view of guidelines--their strengths, their limitations, and how they can be used most effectively to benefit health care. The volume offers Recommendations and a proposed framework for strengthening development and use of guidelines. Numerous examples of guidelines. A ready-to-use instrument for assessing the soundness of guidelines. Six case studies exploring issues involved when practitioners use guidelines on a daily basis. With a real-world outlook, the volume reviews efforts by agencies and organizations to disseminate guidelines and examines how well guidelines are functioning--exploring issues such as patient information, liability, costs, computerization, and the adaptation of national guidelines to local needs.

First multi-year cumulation covers six years: 1965-70.

This text contains the core body of knowledge for case management practice as delineated by the Case Management Society of America (CMSA), the largest professional organization of case managers. The core curriculum provides a "synthesis of case management evolution," and presents essential elements, concepts, and vision for current and future case management practice. This edition is significantly expanded to reflect the dynamic changes taking place in case management. Each chapter is organized in a consistent format that includes learning objectives; introduction; important terms and concepts; key definitions; and references.

This report from the Select Committee on Modernisation of the House of Commons (HCP 282, session 2007-08, ISBN 9780215521675), focuses on regional accountability. The Governance of Britain Green Paper (Cm. 7170, ISBN 9780101717021) put forward proposals for improved democratic accountability and scrutiny of the delivery of public services in the English regions. The Committee, in this report, has concluded that there is clear evidence of an accountability gap at regional level. Regional Development Agencies (RDAs), although accountable to ministers, still conduct many activities that are not subject to a regular, robust scrutiny, and the Committee believes more should be done to monitor the delivery of services. With this in mind, the Committee recommends the establishment of a system of regional select committees, with one select committee for each of the administrative regions in England, with the exception of London. Further, the Committee recommends that up to two regional grand committee meetings should take place in each session for each of the 8 regions. To avoid an adverse impact on House Members' other commitments, membership of regional committees should consist of 10 Members in total. This report therefore sets out a desirability of establishing new structures within the House of Commons to improve regional accountability and Parliamentary scrutiny.

Intended for family physicians and others in primary care delivery. Compatible with International classification of diseases, 9th ed.
