The Orion Platform is used  
to power SolarWinds  
products, including  
SolarWinds NTA. It provides  
centralized administration,  
access control, and alerting  
and reporting. The Orion Web  
Console is the web interface

used for navigating through the NetFlow Summary page, managing SolarWinds NTA settings, or common Orion features like alerts and reports.

How SolarWinds NTA works  
SolarWinds High Availability (HA) provides failover protection for your Orion server and additional polling engines to reduce data loss. If your primary server fails, the HA feature allows your secondary server to take over all services, such as polling and alerting, with minimal downtime.
