Transmission Protocol, SCTP for short, is a reliable network protocol of the internet protocol family, which was designed by the IETF working group Signaling Transport (SIGTRAN). A first version of the protocol is defined in the RFC 2960 published in 2000. Seven years later the IETF published a

PDF Stream

Transmission Protocol (SCTP), defined in RFC 4960, is a reliable, message-based transport protocol. Mobile networks widely use SCTP to transport signaling traffic on various interfaces, such as S1-MME, S6a, and X2, and to send multiple streams of signaling, voice, and other data simultaneously.

Control

~~Stream Control  
Transmission Protocol  
(SCTP)~~

DESCRIPTION The  
SCTP protocol provides  
reliable, flow-  
controlled, two-way  
transmission of data. It  
is a message oriented  
protocol and can support  
the SOCK\_STREAM  
and  
SOCK\_SEQPACKET
