Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the lifecycle of a potential crisis, determining required capabilities and establishing a framework for roles and responsibilities.

Planning Guides | FEMA.gov
Disaster recovery is the restoring of IT infrastructure, data, and systems. Management should identify key business processes and activities to be maintained while IT systems and applications are unavailable and prioritize the order in which these systems are restored, which should be reflected in the BIA. In addition, management should develop a coordinated strategy for the recovery of data center s, networks, servers, storage, service monitoring, user support, and related software.
