whether you're writing science fiction or fantasy, designing RPGs, creating movies or video games, or remodeling a spare asteroid.

A guide to creating realistic languages for RPGs, fantasy and science fiction, movies or video games, or international communication... or just an unusual way to learn about how languages work.

An essential and very readable resource for conlangers and writers who want to create a non-European world, and anyone who wants to know more about our planet's leading civilization. A concise but meaty overview of the history, philosophy, and literature of China, and much more: clothing, architecture, technology, cosmology, medicine, cuisine, and more. Plus grammatical sketches of both Mandarin and Old Chinese, and a discussion of the writing system. The history and literature sections are written for people interested in the Chinese languages, with key terms in both pinyin and hanzi.

The sequel to the Language Construction Kit: learn more about constructed languages and about linguistics: logic, pidgins and creoles, sign languages, the linguistic life cycle, and a meaty step-by-step survey of morphosyntax. Create detailed and plausible languages for RPGs, fantasy and science fiction, movies, or video games... or just learn more about how languages work with the

same accurate yet fun approach as the original LCK.

The book guides students through the basic concepts involved in syntactic analysis and goes on to prepare them for further work in any syntactic theory, using examples from a range of phenomena in human languages. It also includes a chapter on theories of syntax.

Mark J.P. Wolf's study of imaginary worlds theorizes world-building within and across media, including literature, comics, film, radio, television, board games, video games, the Internet, and more. *Building Imaginary Worlds* departs from prior approaches to imaginary worlds that focused mainly on narrative, medium, or genre, and instead considers imaginary worlds as dynamic entities in and of themselves. Wolf argues that imaginary worlds—which are often transnarrative, transmedial, and transauthorial in nature—are compelling objects of inquiry for Media Studies. Chapters touch on: a theoretical analysis of how world-building extends beyond storytelling, the engagement of the audience, and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's *Odyssey* to the present internarrative theory examining how narratives set in the

From master language creator David J. Peterson, creator of Game of Thrones' (HBO) Dothraki language, comes a creative guide to language construction. Peterson begins with a brief history of constructed languages, from Tolkien's creations to Klingon to the thriving global community of language construction. Then, using examples from a variety of languages including his own creations, Peterson offers a captivating and lucid overview, providing a basic foundation of essential linguistic tools for inventing and evolving one's own lexicon.

anyone want to face the demons? In this book the soldier and diplomat Beretos attempts to clear his name against charges that his mission to the Babblers was a failure. Across the Plain from his native Cuzei, a threatening empire is rising. Guarding the mountain pass is a small Babbler barony. Beretos is sent to build up their defenses. That is, if he can help persuade bored nobles that he should be allowed to undertake a mission he doesn't want to do, and if the Babblers even listen to this unwanted foreigner... Mark Rosenfelder's Almea, a world of dizzying complexity, has been explored for years on zompist.com. This is the first full-length story from Almea.

It's the 50th century. Socionomics makes the fifty human worlds of the Incatena prosperous and stable, if a bit raucous on Saturday nights. But socionomics doesn't cover crises, such as the dictatorship that's taken over Okura, or the unscrupulous tycoon who's plotting something over on New Bharat. For that we have Diplomatic Agents. Like Morgan. Is Morgan up to the task? The boss isn't sure. The station AI is doubtful. But our best Agents are out of town; time to see what Morgan can do. "A science fiction comedy, set in a future where the speed of light is respected, though grudgingly, and lives are measured in centuries."

South Asia) for conlanger, conworlders, linguists, and anyone who'd like to learn more about the world. It starts with the topography and history of India, deals with all its major religions, and goes on to cover astronomy, mathematics, daily life, cuisine, clothing, and architecture. In addition there are meaty grammatical sketches of Sanskrit, Hindi, and Tamil, and a discussion of the writing systems that have been used in the subcontinent.
