Filled with updated research and findings, the tenth edition of Schultz and Schultz's THEORIES OF PERSONALITY gives students a clear and cogent introduction to this dynamic field. Organized by theory, this popular text discusses major theorists who represent psychoanalytic, neopsychanalytic, lifespan, trait, humanistic, cognitive, behavioral, and social-learning approaches, while demonstrating the influence of events in theorists' personal and professional lives on the development of these theories. The book also explores the ways in which race, gender, and cultural issues play a part in the study of personality and in personality assessment, and includes numerous examples, tables, and figures that further enhance students' understanding of the content. The final chapter, Personality in Perspective, integrates topics explored in previous chapters and suggests conclusions that can be drawn from the many theorists' work. "What makes people behave as they do? Are people ordinarily aware of what they are doing, or are their behaviors the result of hidden, unconscious motives? Are some people naturally good and others basically evil? Or do all people have potential to be either good or evil? Is human conduct largely a product of nature, or is it shaped mostly by environmental influences? Can people freely choose to mold their personality, or are their lives determined by forces beyond their control? Are people best described by their similarities, or is uniqueness the dominant characteristic of humans? What causes some people to develop disordered personalities whereas others seem to grow toward psychological health? These questions have been asked and debated by philosophers, scholars, and religious thinkers for several thousand years; but most of these discussions were based on personal opinions that were colored by political, economic, religious, and social considerations. Then, near the end of the 19th century, some progress was made in humanity's ability to organize, explain, and predict its own actions. The emergence

of psychology as the scientific study of human behavior marked the beginning of a more systematic approach to the study of human personality. This edition continues to emphasize the strong and unique features of earlier editions, namely the overviews near the beginning of each chapter, a lively writing style, the thought-provoking concepts of humanity as seen by each theorist, and the structured evaluations of each theory"--

Thoroughly updated to include the latest research available, THEORIES OF PERSONALITY, 10E takes a unique theory by theory approach that carefully guides students through major theories on their way to a comprehensive understanding of personality. Richard Ryckman's student-friendly writing style offers a straightforward presentation of major theories, helping readers more easily distinguish between them. The text begins by providing a framework that defines personality and emphasizes the science of personality--including the interrelation between research and theory. Next it introduces each major theoretical position with an objective overview of the theorist's basic concepts and principles. It concludes by noting the ways in which the different theories stimulate additional research efforts and by presenting five current research trends resulting from the work of these earlier theorists. The result is a text that merges the best of classic and contemporary research to equip students with a solid working knowledge of personality. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Presenting coverage of the major theorists who represent different aspects of the approaches to personality, this text also looks at the study of personality theories, suggesting conclusions that can be drawn from many theorists' work.

The respected, recognized best seller in the market, Jerry Burger's PERSONALITY is a solid mid-level book that fuses the best of theory-based and research-based instruction to give students an illuminating introduction to the subject. Burger pairs theory, application, and assessment chapters with chapters that describe the research programs aligned with every major theoretical approach. Biographical sketches of theorists and accounts of the stories behind influential research programs help students understand how classic and contemporary findings relate to each other, and reinforce the idea that theory and research perpetuate one another. In-book self-assessments promote students' interaction with the material. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This seventh edition of 'Theories of Personality' continues to provide comprehensive coverage of the most influential theorists of personality.

Theories of Personality provides a comprehensive foundation on the nature of personality theory, as well as its contributions to science. Coverage of each theory encompasses a biographical sketch of each theorist, related research, and applications to real life. Written by three preeminent psychology professors--Jess Feist, Gregory J. Feist, and Tomi-Ann Roberts--this program is engaging and student-friendly. The ninth edition provides new studies and sections on topics such as ego identity, gender studies, mindfulness and self-actualization, and more. The Connect course for this offering includes SmartBook, an adaptive reading and study experience which guides students to master, recall, and apply key concepts while providing automatically-graded assessments. McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following:

- SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content.
- Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course.
- Progress dashboards that quickly show how you are performing on your assignments and tips for improvement.
- The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping. Complete system requirements to use Connect can be found here: <http://www.mheducation.com/highered/platforms/connect/training-support-students.html>

Designed as a text for both graduate and undergraduate students, this book, originally published in 1995, presents an intrapsychic explanation of human behaviour - concepts based on psychological processes and 'structures' within the mind. In this context, a unique treatment of personality theory is introduced. It focuses on Freud, Kelly and Angyal: Freud's psychoanalytic theory of personality based on desires, Kelly's personal construct theory for thinking, and Angyal's holistic concepts of personality. Each theory is given a detailed analysis in separate chapters. Freud's psychoanalytic theory is cast as a theory of motivation, Kelly's personal construct theory as a theory of cognition, and then it is noted that there is no comprehensive theory of personality based on emotion. Although Angyal's holistic theory is rarely described in modern textbooks, Lester includes this because none of the other holistic theorists rival Angyal in their range of hypothetical constructs or descriptive terms. Then, in sections dealing with alternative viewpoints, the author shows how other personality theorists actually endorse and expand upon the ideas expressed by the aforementioned three, albeit with different terminology. Recognizing the diversity of holistic views in theories of personality, several counterpoint chapters are devoted to the holistic ideas. Lester separates these into three major areas: theorists who have focused on the split in the mind between the real and ideal self; recent theorists who explore the possibility that the mind is a 'multiplicity of selves'; and theorists who, though not having their viewpoints sufficiently articulated in the literature, are still well established in the history of

psychology. Other features include a presentation of the material in modern viewpoints, instead of the precise and perhaps outdated style as written by the individual theorists, and boxed highlights in each section, providing students with practical capsule information for easy reading.
